RECORD OF DIVIDENDS FOR SEVEN YEARS.

On pages 7 and 8 of this issue of the INVESTORS' SUPPLEMENT will be found a record of the dividends paid for seven years past on all railroad stocks sold at the Stock Exchanges in New York, Boston, Philadelphia and Baltimore; also a record of the dividends paid during the same period on some of the leading industrial stocks.

WOODEN AND METAL CROSS-TIES.

The cross-tie problem of the railroads can hardly be called an acute one, yet far-seeing railroad officers have been giving attention for some time to plans for providing substitutes for the wooden tie commonly used in railroad track in this country, and the matter is becoming one of increasing importance. Warnings of forestry experts have often been given that the wasteful system of timber-cutting in this country was endangering the sources of supply so long regarded as inexhaustible.

The denuding of the forests has gone on, however, and lumber production has been increasing. The demand for cross-ties has continued to be too easily supplied to warrant the railroads being much alarmed over future possibilities nor to encourage extensive experiments to find a satisfactory substitute. Their needs in this respect are constantly increasing and have long furnished one of the important demands on the lumber production. Any threatened material decrease in the lumber cut would be reflected immediately in the supply of cross-ties. There has as yet been no indication of any curtailment in the supply, and until that becomes true the attempts to provide a substitute for the wooden cross-tie will probably continue more or less tentative.

If, however, the production of timber gives no sign of immediately falling off, the railroads have still experienced a material advance in the cost of cross ties in the past year, as in so many other supplies used by them. Western roads have had to pay 60 and 65 cents for oak ties formerly costing 45 cents; cedar ties now cost 50 cents each, against 36 cents. Eastern roads are paying eight cents and ten cents more for their oak ties than formerly, and even proportionately more for some other grades. It is not surprising, therefore, that renewed interest has developed in various efforts to prolong the life of ties, and to find substitutes for them. Cross-tie preservation has reached a considerable development in certain parts of the country where ties are particularly costly, and very fair success has been attained at various plants and by a number of different methods of treatment. The Southern Pacific, in particular, among individual companies, has carried on extensive and valuable experiments to prolong the life of ties by chemical treatment with oil or other preservatives. Such treatment materially prolongs the useful life of ties, in some cases doubling the time they may be left in the track. However successful this treatment of cross-ties may be, it merely lessens the frequency of renewals; it only delays but does not prevent their ultimate decay. The development of tie-preserving methods may be expected to be materially advanced in coming years, but at the same time search for a substitute for cross-ties will go on.

So far the metal tie has not established a place for itself, whereas in foreign countries, in Europe and in Mexico, various forms are in more or less extensive use. Sufficient reasons for the slowness of the American railroads to seek economy by steel ties have been previously referred to, but this attitude is likely to give way to one of more interest when a design which promises more adaptability to the needs of the conditions in this country is developed. Opinion as to the metal which should be used for ties is unsettled. They have been made of rolled steel, cast and wrought iron, pressed steel, etc. With more unanimity as to the best material for metal sleepers, more advance might be possible in obtaining a satisfactory design.

As matters stand now no metal ties are being put down by American railroads, and those heretofore laid, comprising scarcely half a dozen miles of track, have been for experimental purposes, the outcome of which has not warranted further extension of their use. This may seem a gloomy outlook for the metal tie, but conditions may alter before a great while and bring the question forward in a more imperative form. Not a few officers deem it advisable to anticipate such a possibility, and in the past year renewed interest has been taken in the utility of metal ties in this country. The experience of European roads, which have used various forms in considerable quantities for a number of years, does not seem to be of much help in solving the problem to be met on American railroads.

The metal ties which have been used in this country have not only been costly, but they have not withstood the conditions of traffic, nor held the ballast of the track in which they were placed, so that track surfacing and maintenance have been troublesome and expensive. Such designs of metal ties as have had practical experimental service in this country have been of steel. Their first cost, therefore, has been high, so that if they had proved to be altogether satisfactory in service, no wide extension of their use could have been realized. The cost of steel ties has been about $2 50 each, in itself almost prohibitive, except possibly where peculiar conditions made it advisable to do away as much as possible with disturbance of the track surface to renew ties, or any other purpose. Besides their first cost, the steel ties have made a poor record as to cost of maintenance. Track laid with some types of these ties has cost 30 per cent more for keeping in line and surface than a similar stretch of road laid with wooden ties, and with other forms the cost has doubled. There have been numerous failures of the ties, the light form adopted to lessen the cost when steel is used being unsuited to withstand the crushing weight of heavy trains, so that breakages occur.

Despite such an unfortunate record as is here set forth, it does not follow that the metal tie will not yet take its place in the economy of railroad track construction in this country. It will have to be developed in new directions instead of those that have been followed heretofore, but the outlook is by no means hopeless. With the present high prices of steel, ties made of that metal are likely to be so expensive in first cost as to make their use prohibitive. Cast iron is not regarded as suitable, but other forms of iron have been suggested as desirable, both in the matter of strength and in relatively reasonable cost. Malleable iron, the use of which in various lines of railroad supply manufacture has been rapid of late years, seems to offer many advantages. It is so easily manipulated in manufacture that the design of the tie would not have to be weakened on that account; and there would not exist the same desire to save metal because of high cost, as where a tie is made of steel, which has brought about not a few of the failures of such forms. With heavier ties, not only would greater strength be secured, but the corrosion, which has been a considerable element in developing weakness, would be so lessened that it would cease to be significant or important.

The life of metal ties has been estimated at thirty years, although this depends very largely on local conditions. Very few, if any, have been in the track that length of time, the earlier styles having been replaced with improved forms. It is probably safe, however, to put the period of their useful life at four to five times that of good wooden ties. With any further material rise in the prices of wooden ties, the economy of metal ties may become considerable, and with that condition there is little reason to doubt that satisfactory designs will be developed.

HEAVY RAILS.

The tendency toward the use of very heavy rails which was so pronounced a feature of the development of railroad track practice a few years ago seems to have been checked. It might be said that a distinct reaction toward the use of lighter rails, or rather what may be termed moderate weight, has become noticeable. The predictions that rails weighing 100 lbs. to the yard would be rather generally used on sections of road with extremely heavy tonnage have not been borne out. When a number of large companies in the East, whose prominence made their action in the matter of much consequence, placed moderate orders for such rails two or three years ago, it was generally anticipated that other contracts would follow, but the reverse has been the case, and not many 100-lb. rails, unless intended for special use, as on an important bridge, etc., have been rolled for some time.

While orders for rails of that enormous weight were confined to a few companies, 90 and 95-lb. rails have been put in the track of a good many roads in considerable quantities. It cannot therefore with accuracy be said that the use of these rail sections has been practically abandoned, as the 100-lb. rails have been, and yet the sentiment of maintenance-of-way engineers is not as much in favor of their use as was the case some time ago. Railroads which three or four years ago were ordering rails approximating 90-lbs. to the yard and over are now contracting for 80-lb. or 85-lb. sections. That weight is considered by many to furnish the best service under the heaviest traffic.

There would seem to be some force in the argument that the experience which has thus far been accumulated as regards the economy and desirability of heavy rails is not extensive or various enough to warrant very settled or positive opinions. The results of such experience as has been available, however, are not encouraging to the use of much heavier sections than 80 lbs. or 85 lbs. for general traffic. Those of heavier weight seem to have been generally disappointing. They have not given the increased wear under traffic that was looked for and was the basis of the economical argument for their adoption. In practice they have worn out more rapidly than anticipated, and in fact have not given the same wear per ton of traffic as lighter sections. The railroads, therefore, get no return in increased wear for the higher cost of the heavier rails. On this showing alone it would be no wonder that the heavy sections had fallen into disfavor. It remains to be considered whether the causes which have produced the present dissatisfaction are remedial or not. Conflicting opinions are held on this point, and the most that can be said from an impartial standpoint is that the data at hand is indecisive.

One element of uncertainty in forming a conclusive opinion is that practically all the rails have been of one type of section. The form of the rail is one

of the most important factors having to do with its life, as has been thoroughly shown in common practice. The limit of experience with heavy rails to those of one type has been, curiously enough, the outcome of the material progress effected by a laudable reform. Formerly the types of rail sections were exceedingly numerous. Each engineer of a railroad company felt called upon to design a new section when a new weight of rail was to be used or a large order was to be awarded. This state of affairs has been much improved since 1893 by the general adoption in practice of a series of rail sections for various weights designed, after a long discussion, by a committee of the American Society of Civil Engineers. This series of rails, which has proved to be of excellent design in most of the types promulgated, undertakes to distribute the amount of metal in a rail, in accordance with fixed rules, among its three members, the head, the web and the flange. A distinguishing feature of the design beyond the composition and distribution of the metal is the deep head of the rail.

With the reports of unsatisfactory performances of heavy rails, which all have been rolled after this standard section, the question has naturally been brought up whether it has not been in part due to the design of the section. Might not another type of rail make a better record? Not a few who are entitled to speak with authority incline to this view. What is perhaps the more general opinion shifts part at least of the burden of the failure of the rails to the rolling mills. Whatever may be the general type of a rail, its wearing qualities depend on its chemical composition and the physical treatment it receives in the process of manufacture. It has been claimed that the proportion of carbon, which is the hardening element in the rail metal, has not been properly increased, and again that the rail head has not been sufficiently worked at lower temperatures to produce the desired hardening. The latter assertion relates directly back to the design of the rail. A strong point in favor of the rail section series of the American Society of Civil Engineers has been that they have been of symmetrical design, which has simplified the problem of rolling for the rail mills. In the heavier sections this seems to be outweighed by other matters. In order to preserve the equal distribution of the metal as the weight increases, the depth of the head, which cannot be much widened, becomes so considerable that it cannot be evenly cooled as it goes through the final passes of the rolling mill. It is therefore unevenly worked and of unequal quality.

It is thought by some that a change in the dimensions of the heavier rail sections to provide a head of less depth, so that the manipulation of the metal in manufacture could be more uniform, might improve the wearing qualities of the heavier sections. On such a point there is room for wide difference of opinion, for the present sections are the result of a close study by capable engineers and have strong adherents, while it is to the advantage of both the mills and the railroads to encourage their use and to reduce the number of types of rail sections.

Other reasons might be cited for the apparent failure of the heavy rails than their chemical composition or their physical treatment. Those, in fact, are matters which it is probable will always engage more or less discussion. Whatever the reasons may be, however, it seems that the experience so far is that heavy rails do not give as efficient wearing service as light sections. It may be pointed out, however, that the wearing quality is not the only element to be considered in weighing the merits of heavy rails. They afford a greater stiffness to the thrust of the moving loads, and this may well be more important than wearing qualities. The reduced resistance to the traffic, and the resulting advantages in promoting the economical movement of traffic, is too important to be overlooked. A track laid with heavy rails requires less motive power to haul a given load than if lighter rails were laid. There is less wear and tear on the rolling stock and it may also be suggested that a less number of men would be required per section to keep the track in as good condition as that laid with light rails. In view of the increasing size of locomotives and cars, and the growing volume of tonnage, it would seem as if the large railroads can not use a rail of less than 80 lbs., while the tendency would always be toward a heavier weight. It may be not at all improbable that the questions which have so far interfered with the use of heavy rails, and caused a reaction to lighter sections, may be overcome.

OIL-TREATED TRACK.

The method of treating the road-beds of railroads with low combustible oil for laying the dust was introduced hardly three years ago on one of the New Jersey divisions of the Pennsylvania Railroad, but has since been adopted by an extensive number of companies in the Eastern States. This hardly implies that such roads suffer more than those in other sections of the country from dusty track, but, if anything, that the subject is deemed of more importance and that greater effort is put forth to further improve the conditions of traveling in this regard. In fact, with so much of Eastern railroad track ballasted at considerable expense with broken stone, gravel and cinders, the inconveniences of traveling because of a dust-laden atmosphere have become much reduced. Still, conditions are by no means ideal even on roads where the most careful attention is given to the condition of the road-bed. It is, therefore, not surprising that a method of doing away with dust altogether, which seemed so promising as that of the oil treatment, quickly came into quite general use.

The method of application and various details connected with the treatment have been previously described in the INVESTORS' SUPPLEMENT, and need not be referred to again. Some testimony has recently been published by the officers of a number of roads which have been coating their roadways with oil, and their experience is of sufficient interest to summarize. It has been found that gravel or cinder ballasted track, when well sprinkled with oil, is practically dustless. The oil destroys weeds, the bane of conscientious trackmen, preserves the life of ties to some extent, and makes the track water-proof, rain draining off the surface instead of soaking into the ground. This is an important point, for the proper drainage of a road-bed is one of the difficult problems of track maintenance. If the water is not thoroughly drained and there is seepage into the earth below the ballast, it weakens the roadway, freezing in winter, and heaving the track. Where this does not make a dangerous condition, it destroys the work of a long period in bring-

ing the roadway up to proper condition. Disregarding these cumulative advantages of the oil-sprinkled roadway, it appears to have been satisfactorily proved that with gravel ballast dust is entirely allayed, which is the main feature sought for. Such a track is claimed to have all the essential qualities of a stone-ballasted roadbed, and it is said also that with the same expenditure of labor it is easier to make and maintain a good surface than with stone ballast.

On these latter points some differences of opinion exist. The superiority of stone ballast over oil-sprinkled gravel is advanced by many who have both classes of track under their care, but after all the relative merits of the two different ballasts is an extraneous subject. Stone ballast may be treated with oil, if thought desirable, but a good stone-ballasted track ought to be practically free from dust. With fine sand ballasting, the experience in the use of oil as a dust allayer does not seem to have been so successful as with gravel. Where the oil penetrates three inches in the latter it hardly penetrates an inch in sand. The result has been that a top layer of the sand cakes, and such flying dust, laden with oil, is particularly abominable. A heavier sprinkling of oil with this character of ballast might be a remedy. The distribution of 2,500 gallons of oil per mile of track is said to have effectually laid the fine sand in the track of one of the Jersey roads leading to the seashore.

As to the permanency of the treatment, it may yet be too early to speak conclusively. Some officers consider it necessary to oil the track each year. In any event one application is not sufficient. The treatment must be repeated for several years, though the quantity of oil used after the first year can be diminished. The Boston & Albany, which has an excellent track, used 4,000 gallons of oil per mile of double track the first year, and half as much when the treatment was repeated. The cost is given by one company as 4½ cents a gallon of oil, to which must be added the royalty and the cost of the sprinkling outfit, which is only slight, and the small labor force needed. The oil is of low combustible grade, so that there is little or no danger of fire.

TRACK TANKS.

Track tanks have been built by quite a few companies operating long-distance fast passenger trains. They save the necessity of slow-downs and long delays at water stations to replenish the water supplies of the tenders, and their convenience in this respect has been so pronounced that questions as to their cost of construction or maintenance have been considered subordinate. The saving of a few minutes' delay by eliminating the several stops otherwise required on each run of a locomotive becomes an important matter with the high speeds maintained by a very large number of trains on every important road in this country.

The absolute need of track tanks to the more important lines, on their busiest sections at least, strikingly differentiates some of the conditions governing passenger train operation in this country from those existing in foreign lands, where the convenience and utility of the track tank, as developed here, is quite unknown. Time savers as they have proved themselves to be, and indispensable where frequent and fast passenger trains are operated, there has been a disposition among railroad officers to raise the question whether their construction has not been undertaken at points where their need has not been altogether obvious, and where the expense they entail, both in first cost and in maintenance, has not been warranted by the benefits realized.

The building of a track tank is merely an addition to the existing means of locomotive water supply. They do not take the place of water tanks or the regular plant for supplying water to locomotives. Only a small portion of the engine equipment makes any use of them, so that in many cases the saving which might be figured in preventing delays to fast trains, occasioned by refilling their engine water tanks, bears little relation to their absolute expense. Considerations such as these have tended to prevent as rapid extension of their use for sometime past as occurred a few years ago after the first favorable reports were made by the large companies which instituted their use.

The action of the Baltimore & Ohio, recently announced, in equipping 50 freight locomotives with water scoops to take water from the track tanks, is, therefore, peculiarly interesting. This is not because the practice is altogether an innovation, for on some roads, like the New York New Haven & Hartford, where it is peculiarly desirable to keep at least a portion of the freight trains constantly moving, some of the freight engines have been equipped to get their water supply from the track tanks. This, however, is special action, whereas the Baltimore & Ohio plan aims at the general use of the track tanks by all the engines running over the road, and would make them the main, if not the only, source of engine water supply. The experiment, if successfully carried out, promises to have important consequences. Even if it does not develop the track-tank system as the primary means of supplying all engines with water, it may avoid some of the present duplication of water-supply plant on roads having track tanks for the convenience, chiefly or altogether, of their fast passenger trains. The cost of water supply on a large road is considerable, and a material reduction on the investment represented or the running charges in this account will be quite an item to a company. It is possible that the track-tank system, which has been regarded as advantageous and convenient rather than economical, will develop strong claims in the latter regard.

Track tanks are generally built in sections a fourth of a mile long. They are merely metal troughs of iron or steel plate 3-16 inches thick, usually 6 or 7 inches deep and 19 inches wide, placed in the middle of the track, the ties being cut away at the top, 1½ inches or 2 inches to receive them. Water is supplied to them by pumping or from a reservoir under head, usually through a main and a system of track pipes, which enter the trough at intervals to facilitate rapid refilling, when the water has been scooped out by a locomotive. The latter is fitted with a flexible hanging scoop which is lowered into the tank when the tender is to be filled, and water can be easily taken into the tender when the engine is running at a speed of 45 miles an hour, so that very little slowing down is required. The water in the tanks, which are of course open, is kept from freezing in winter by the introduction of live steam through the pipes from the pumping station or by other means easily made effective.

RAILROAD AND INDUSTRIAL DIVIDENDS FOR SEVEN YEARS.

The following table shows the dividends paid for seven years past on all railroad stocks (of steam railroads) sold at the Stock Exchanges in New York, Boston, Philadelphia and Baltimore. Stocks which have been merged or consolidated, and have no longer a separate existence, are not included. Dividends actually paid form the basis of a year's total. Those declared in one year and paid in another appear in the latter year. In classifying the companies, we bring together under each market the stocks dealt in in such market—thus Boston & Albany appears in the Boston list, Pennsylvania Railroad in the Philadelphia list, etc. *We have also added at the extreme end of the table a statement to show the dividends for the same periods on some of the leading industrial stocks.*

RAILROAD COMPANIES.

(For Miscellaneous Companies see pages 149 to 167 inclusive.)

EXPLANATORY.—This Supplement is expressly intended for use in connection with the investment news and official reports published from week to week in the Chronicle. Frequent references are therefore made to the volume and page of the Chronicle (as, V. 64, p. 000) where fuller information may be found. Following each statement also is given a reference to the latest news item in the Chronicle respecting the company. As every such item contains a reference to the last preceding item, the reader can run back over the company's history at pleasure. Annual reports are in black-faced figures, and *italics* indicate a paragraph headed by the name of some *other* company.

Index.—Any company not in its regular alphabetical order may be found by means of the index to roads leased and consolidated.
Dividends.—The *dividends* tabulated in the text are those actually *paid* during the calendar years named, irrespective of when *earned.*
Net earnings are given after deducting operating expenses and usually taxes, but not interest, rentals or other fixed charges.
Securities.—These are described in table at head of page [except the stock, for lack of space, sometimes only in text below] as follows:
Miles of Road.—Opposite bonds, this means the miles of road owned covered by the mortgage.
Size or Par Value.—Shows (in dollars unless otherwise marked), the denominations or par value, "100, &c.," signifying $100 and larger
Rate Per Cent.—The interest and dividend rate, *per annum* is here shown: g., gold; cur., currency; x, extra; s. stock or scrip.
When Payable.—J. & J. stands for January and July; F. & A., February and August; M. & S., March and September; A. & O., April and October; M. & N., May and Nov.; J. & D., June and Dec.; Q.—J., quarterly from Jan.; Q.—F., quarterly from Feb.; Q.—M., quarterly from March.
Bonds, principal when due, etc.—This column shows the date when the bonds mature and the amount and date of the *last* dividend.
Abbreviations in table: M. for "mortgage;" gen. M. for "general mortgage;" con. M. or consol. M. for "consolidated mortgage;" inc. M. or "income mortgage;" g. for "gold;" c. or cur. for "currency;" guar. p. & l. for "guaranteed principal and interest;" cum. for "cumulative;" non-cum. for "non-cumulative;" conv. for "convertible;" pref. for "preferred;" s. f. for "sinking fund;" l. gr. for "land grant;" r. See V. 67, p. 817, 1206, 1261, and official circular V. 67, p. 841; also V. 67, p. 1355; V. 69, p. 649. LEASED LINE BONDS.—The Baltimore Belt bonds deposited were called by the company under the option reserved per agreement in V. 66, p. 1235, and purchased at par and interest on Sept. 1, 1899.—V. 69. p. 25, 277, 333.

The Schuylkill River East Side bonds, stamped per agreement, V. 68, p. 40, are treated as follows: The road is leased at a rental equivalent to interest at 5 per cent on the existing bonds, but the new company has the right to purchase all the Schuylkill bonds at 110 and accrued interest at any time after Dec. 1, 1900, and prior to Dec. 1, 1903, on 30 days' notice. If not so purchased, the company will assume the ultimate payment of the principal when due. V. 69, p. 1063,

The Staten Island Rapid Transit property was sold under foreclosure in April, 1899, subject to the $1,000,000 first 6s, part of which were purchased for the B. & O. Under the agreement of Jan, 1899 (V. 68, p. 189), the $2,500,000 second mortgage 5s were exchanged for a like amount of new 4s issued by the reorganized Staten Island Co. These new 4s the B. & O. RR. agrees to purchase at par and interest in cash within 5 years, and meantime to guarantee interest thereon at 4 per cent. V. 68, p. 189, 333, 525; V. 69, p. 696,

The West Virginia & Pittsburg (see agreement in V. 67, p. 1310), has been operated since Sept. 1, 1899, under a 99 years' lease, for 4 per cent on the mortgage, to be appropriated to payment of bond interest, the B. & O. having the option for 5 years to purchase the bonds at par and accrued interest on 60 days' notice. V. 69, p. 439.

GENERAL FINANCES.—The large decrease in net earnings for the year 1898-9, it is explained, is caused by the fact that the receivers in settling their accounts have charged against the revenue of the year large sums ordinarily extending over a much longer period, and also by the large amounts put into the property and charged to operating expenses. See official statement, V. 68, p. 1224. As to physical rehabilitation under the receivership, see official statement, V. 69, p. 128.

In addition to the $49,975,000 first mortgage g., 4s issued in June, 1899, for reorganization purposes, $1,500,000 additional of said bonds, being part of the $7,000,000 reserved for corporate purposes, were used for the purpose of providing funds for the purchase of equipment and for other improvements to the mortgaged premises.

The purchase in July, 1899, of $2,052,000 of the total issue of $3,500,000 Pitts. & West. 2nd. mortgage bonds, in addition to its former holdings, will insure the reorganization of the property in the interest of the B. & O. V. 69, p. 132.

"The fixed charges will thus be well within the past net income of the property—even that of the last fiscal year of extreme depression. The new company will be relieved from floating debt and the embarrasment of car and wheelage trust payments, and will start with substantial working capital." The following is also given:

Apart from the large amount provided in the plan dated June 22, 1898, to be expended on the B. & O. RR. properties, the plan for the reorganization of the Central Ohio RR. system provides $3,000,000 to be expended on the properties comprised therein and for additional equipment; and the B. & O. Southwestern plan provides $5,500,000 to be expended in like manner on the Baltimore & Ohio Southwestern System. The above statement of earnings does not allow for any increase in earnings from these expenditures, which, it is confidently expected, should largely increase the surplus over fixed charges.

RESULTS FOR HALF-YEAR ENDING DEC. 31, 1899.—The preliminary income account for six months ending Dec 31, 1899, accompanying report for 1898-9, showed results partly estimated as follows, the fixed charges being on reorganized basis:

ORGANIZATION, CONTRACTS, ETC.—The Company was chartered in Canada February 28, 1868, and debt readjusted in 1878. In Nov., 1882, a close contract was made with the Michigan Central for 21 years from January 1, 1883, providing for the payment to Canada Southern of one-third the joint income over all fixed charges. The contract provided for a re-apportionment every five years, and in December, 1892, it was agreed to give the Canada Southern 40 per cent and the Mich. Cent. 60 per cent of the first $1,000,000 of net earnings, any amount over that to be divided on the basis of one-third and two-thirds, as before. But under the original contract each company is still accorded all benefit from the reduction in its fixed charges; consequently as the Michigan Central to Jan. 1, 1898, had reduced its charges about $327,000, that amount is credited to it before division is made V. 64, p. 5.

In Sept., 1899, the Greenbrier Ry., most of whose stock is owned, was building a branch line from Whitcomb Station on the C. & O. main line, up the Greenbrier River to its forks, 95 miles, within about 40 miles of the West Va. & Pitts., which company proposed to build a line to connect the two systems. V. 69, p. 338, 383, 490, 905. In Aug., 1899, an 18-mile branch along and across the New River, West Va., to develop additional coal territory, was in progress. V. 68, p. 338, 384.

HISTORY, &c.—The former Chesapeake & Ohio was sold in foreclosure April 2, 1878, and this company organized. In 1888, under the direction of Drexel, Morgan & Co., reorganized without foreclosure, and the road extended to Cincinnati. The consolidation with the Richmond & Alleghany was consummated in January, 1890. The Elizabethtown Lexington & Big Sandy and other roads were absorbed in 1892. In September, 1893, the Chesapeake & Ohio Steamship Co., controlled by this company, began operations. See below and V. 55, p. 1078.

CAPITAL STOCK.—Common stock is $60,513,900; increased from $45,000,000 to this figure since 1892 through exchange of practically all the $25,000,000 of preferred stocks for common stock and general mortgage 4½ per cents in certain proportions. *First preferred* for $18,500 and *second preferred* for $4,000 only was outstanding July 1, 1899. See terms of exchange in V. 54, p. 642.

DIVIDENDS.—First dividend, 1 p. c., paid Oct. 25, 1899. V. 69, p. 383.

BONDS.—The *series A bonds of* 1878 cover, subject to the *purchase money* 6s, the main line from Richmond, Va., via Charlottesville to Ashland, Ky., 428 miles, and are equally secured with the *Peninsular Extension* 6s by first mortgage on extension to Newport News, 75 miles.

The *consolidated mortgage* due in 1939 is for $30,000,000 (trustee, Central Trust Company), and sufficient bonds are reserved to provide for prior liens. This mortgage is also secured by deposit in trust of the $11,000,000 bonds and two-thirds of the stock of the Maysville & Big Sandy RR., [on road Ashland to Covington, Ky.], and of the Bridge to Cincinnati, all owned by Ches. & O. (Abstract, V. 49, p. 147.)

Richmond & Allegheny Division bonds cover the low-grade freight route from Richmond via Lynchburg to Clifton Forge and branches. (Mort. abstracts, V. 51, p. 144.)

The *general mortgage of* 1892 (Central Trust Co. and H. T. Wickham trustees) is for $70,000,000, but additional amounts at $25,000 per mile may be issued for double-tracking. Of the $70,000,000 as above, $32,691,000 bonds were reserved to provide for the $30,000,000 consols of 1889, issued or to be issued, etc. The balance unissued may be sold for new acquisitions, rolling stock, etc., but not more than $2,000,000 thereof in any one year. The mortgage covers the entire property of the company, real and personal, at the time the deed was made, and all additional property and mileage acquired with the proceeds of the bonds. See full abstract of mortgage in V. 54, p. 644; also V. 54, p. 642; V. 55, p. 335. In Jan., 1900, $26,057,000 had been listed on New York Stock Exchange.

The *Elizabeth't'n Lexington & Big Sandy* first mortgage bonds, interest on which has been reduced to 5 per cent, have been endorsed with the C. & O. guaranty of principal and interest, and general mortgage bonds have been set aside to retire them at maturity.

The 1st 4s on the Greenbrier Ry. are direct obligations of the C. & O. Of the $3,000,000 authorized, $1,500,000 were to be issued at once and the remaining $1,500,000 only for further construction or equipment, extensions, betterments, &c.—V. 69, p. 383.

The *Louisville & Jeffersonville Bridge* bonds, of which $3,000,000 are outstanding, are guaranteed jointly and severally by the Chesapeake & Ohio and Cleveland Cincinnati Chicago & St. Louis; any deficit on account of the bridge is payable by them in the proportion of one-third and two-thirds respectively—see V. 60, p. 130; V. 61, p. 327, 559; V. 62, p. 84 and separate statement for L. & J. Bridge Co.

OPERATIONS, FINANCES, &C.—Since the reorganization in 1888, when the control of the company was placed for five years in the hands of trustees, the property has been greatly enlarged and improved.

In Jan., 1900, Pennsylvania interests were reported to have purchased a large block of stock, and with the Morgan-Vanderbilt interests, it is understood, now have full control.—V. 70, p. 75.

The interest charges for the fiscal year 1899-00 are estimated at $3,220,616, against $3,133,097 in 1898-99. V. 67, p. 322. In Jan., 1898, $1,590,000 4½s were sold at a price sufficient to pay off all loans and accounts and provide a cash surplus for working capital.

The steamship line was formally opened Sept. 7, 1893, and owns six new steamers, using the railroad wharves at Newport News.

The stockholders voted Oct. 24, 1899, to aid the Greenbrier Ry. to construct its road by the issue of not over $3,000,000 C. & O. 4 per cent gold bonds, payable Dec. 1, 1999, secured by mortgage on the Greenbrier Ry. See above.—V. 69, p. 383.

HISTORY.—Succeeded to the property in October, 1862; the St. Louis Jacksonville & Chicago RR. has been merged. (V. 69, p. 645.) In April, 1899, the road was purchased by the Harriman syndicate, as below stated, and, it is understood, will be operated in the joint interest of several of the leading trunk lines, Union Pacific, etc.

LEASED LINES.—The *Kansas City St. Louis & Chicago* is leased in perpetuity from Nov. 1, 1877, at rental of 35 per cent of gross earnings. Its bonds are held by the U. S. Trust Co. as security for Alton bonds of 1878. These have a sinking fund (in 1896) of $135,690 per annum. Common stock, $271,800, of which $157,600 owned by C. & A.

The *Joliet & Chicago* is leased from January 1, 1864, for the term of its charter, and forms part of the main line. Rental, 7 per cent on stock.

The *Louisiana & Missouri River RR.* was leased in perpetuity, Aug. 1, 1870. Under the agreement of Nov. 13, 1894, the Alton assumed to pay, in lieu of rentals, all interest on the *first* and *second* mortgage bonds and their principal when due, also 7 p. c. per annum on the guaranteed preferred stock, and also to purchase the L. & M.R. unguaranteed preferred at $29 50 per share and the common at $10 per share. V. 59, p. 1057. Unguaranteed preferred stock is $1,010,000 and common $2,312,700, neither of which have ever paid dividends. In Dec., 1898, all but 247 shares of unguaranteed preferred and 445 shares of common stock had been purchased by Chicago & Alton.

GENERAL FINANCES.—In Apr., 1899, a syndicate composed of Geo. Gould, J. H. Schiff, E. H. Harriman and James Stillman had acquired over 95 per cent of the preferred and common stocks, paying therefor $200 and $175 per share respectively. V. 68, p. 230, 281. 379, 427, 523, 670. See official circular in V. 68, p. 281. The syndicate in May, 1899, also acquired control of the St. Louis Peoria & Northern, of which Springfield to Peoria, 63 miles, was taken over by the C. & A; balance by the Ill. Central. The syndicate also assumed the lease of the Chicago Terminal Transfer terminal facilities at Chicago under a modified rental. V. 69, p. 26, 1147; V. 68, p. 1022, 1225.

The mortgage securing $40,000,000 3 per cents, dated Oct. 1, 1899, will refund bonds marked "¶" in table maturing during next four years, and also provide fund for improvements and extensions. Bonds in excess of $40,000,000 may be issued thereunder on vote of three-quarters of stockholders for extensions of not over 500 miles, main track, at not exceeding $20,000 per mile, to fund leased line rental obligations and for future betterments not to exceed $5,000,000 at not over $1,000,000 per annum from Jan. 1, 1900. Stockholders subscribed in July, 1899, for the $40,000,000 new bonds at the rate of $650 cash for each $1,000 face value, the first $10,000,000 (25 per cent) being paid for Oct. 10, 1899. V. 69, p. 591. See official circular in V. 69, p. 178; also p. 26, 129, 541.

ORGANIZATION, &C. This was a consolidation in July, 1875, of the Chicago Burlington & Quincy in Illinois and the Burlington & Missouri River in Iowa. In 1880 the Burlington & Missouri in Nebraska was absorbed. The leased lines are practically owned and there is no charge for rentals in the income account, except as interest on bonds. The Chicago Burlington & Northern and various other subsidiary lines situated in Illinois were absorbed in May, 1899. V. 68, p. 975. In Dec., 1889, acquired Chicago Ft. Madison & Des M. RR.—V. 70, p. 75.

In Dec., 1899, in addition to mileage above, Grant City to Albany, Mo., 20 miles, and an extension of a branch line from Arcadia to Sargent, Neb, 20 miles, were operated. A branch from Alliance, Neb., to Hartville, Wyoming, 141 miles, was under construction, of which Alliance to Camp Clark, in the Valley of the North Platte, about 35 miles, was completed in 1899.

LANDS.—Only 48,372 acres remained unsold June 30, 1899; land notes outstanding, including interest payable, $154,630.

CAPITAL STOCK.—The stock has been increased for the acquisition of new lines, and in 1880 a distribution of 20 per cent was made. From Sept. 1, 1890, to Nov. 30, 1899, $12,158,800 stock was issued to retire an equal amount of convertible debentures, leaving still outstanding $3,119,900 convertible bonds. In April, 1899, $4,041,500 additional stock was subscribed at par. See "General Finances" below.

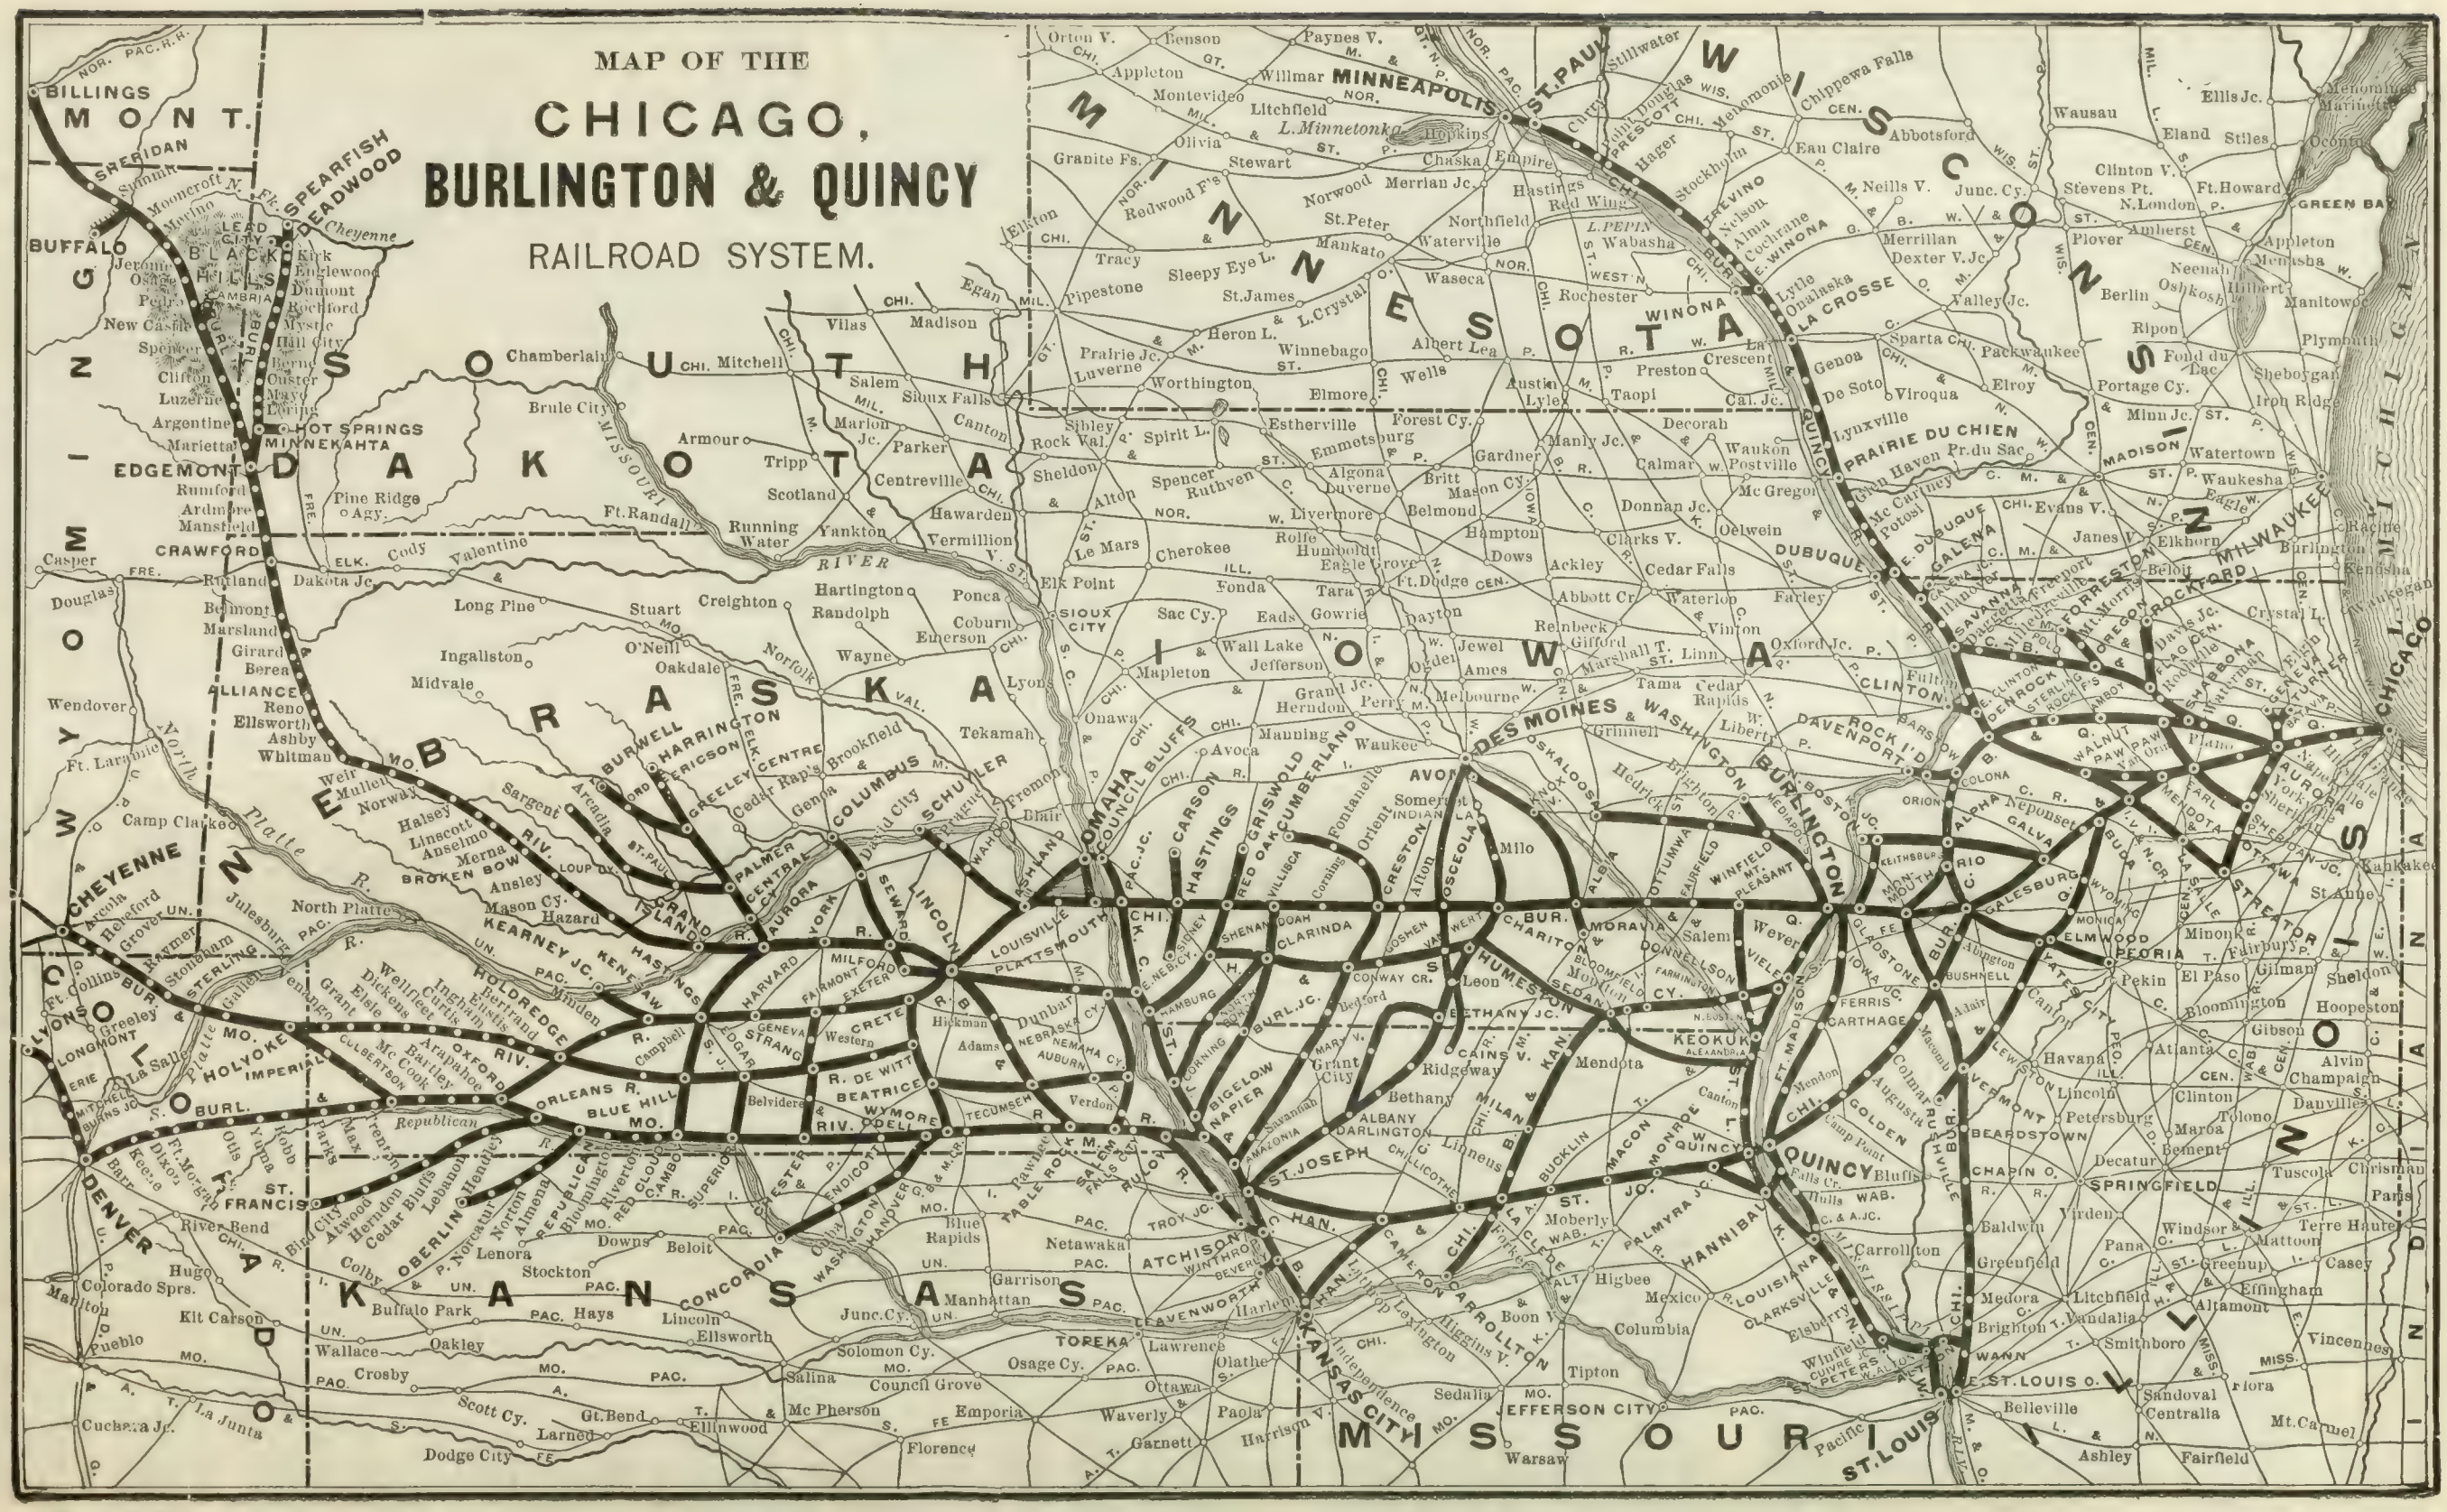
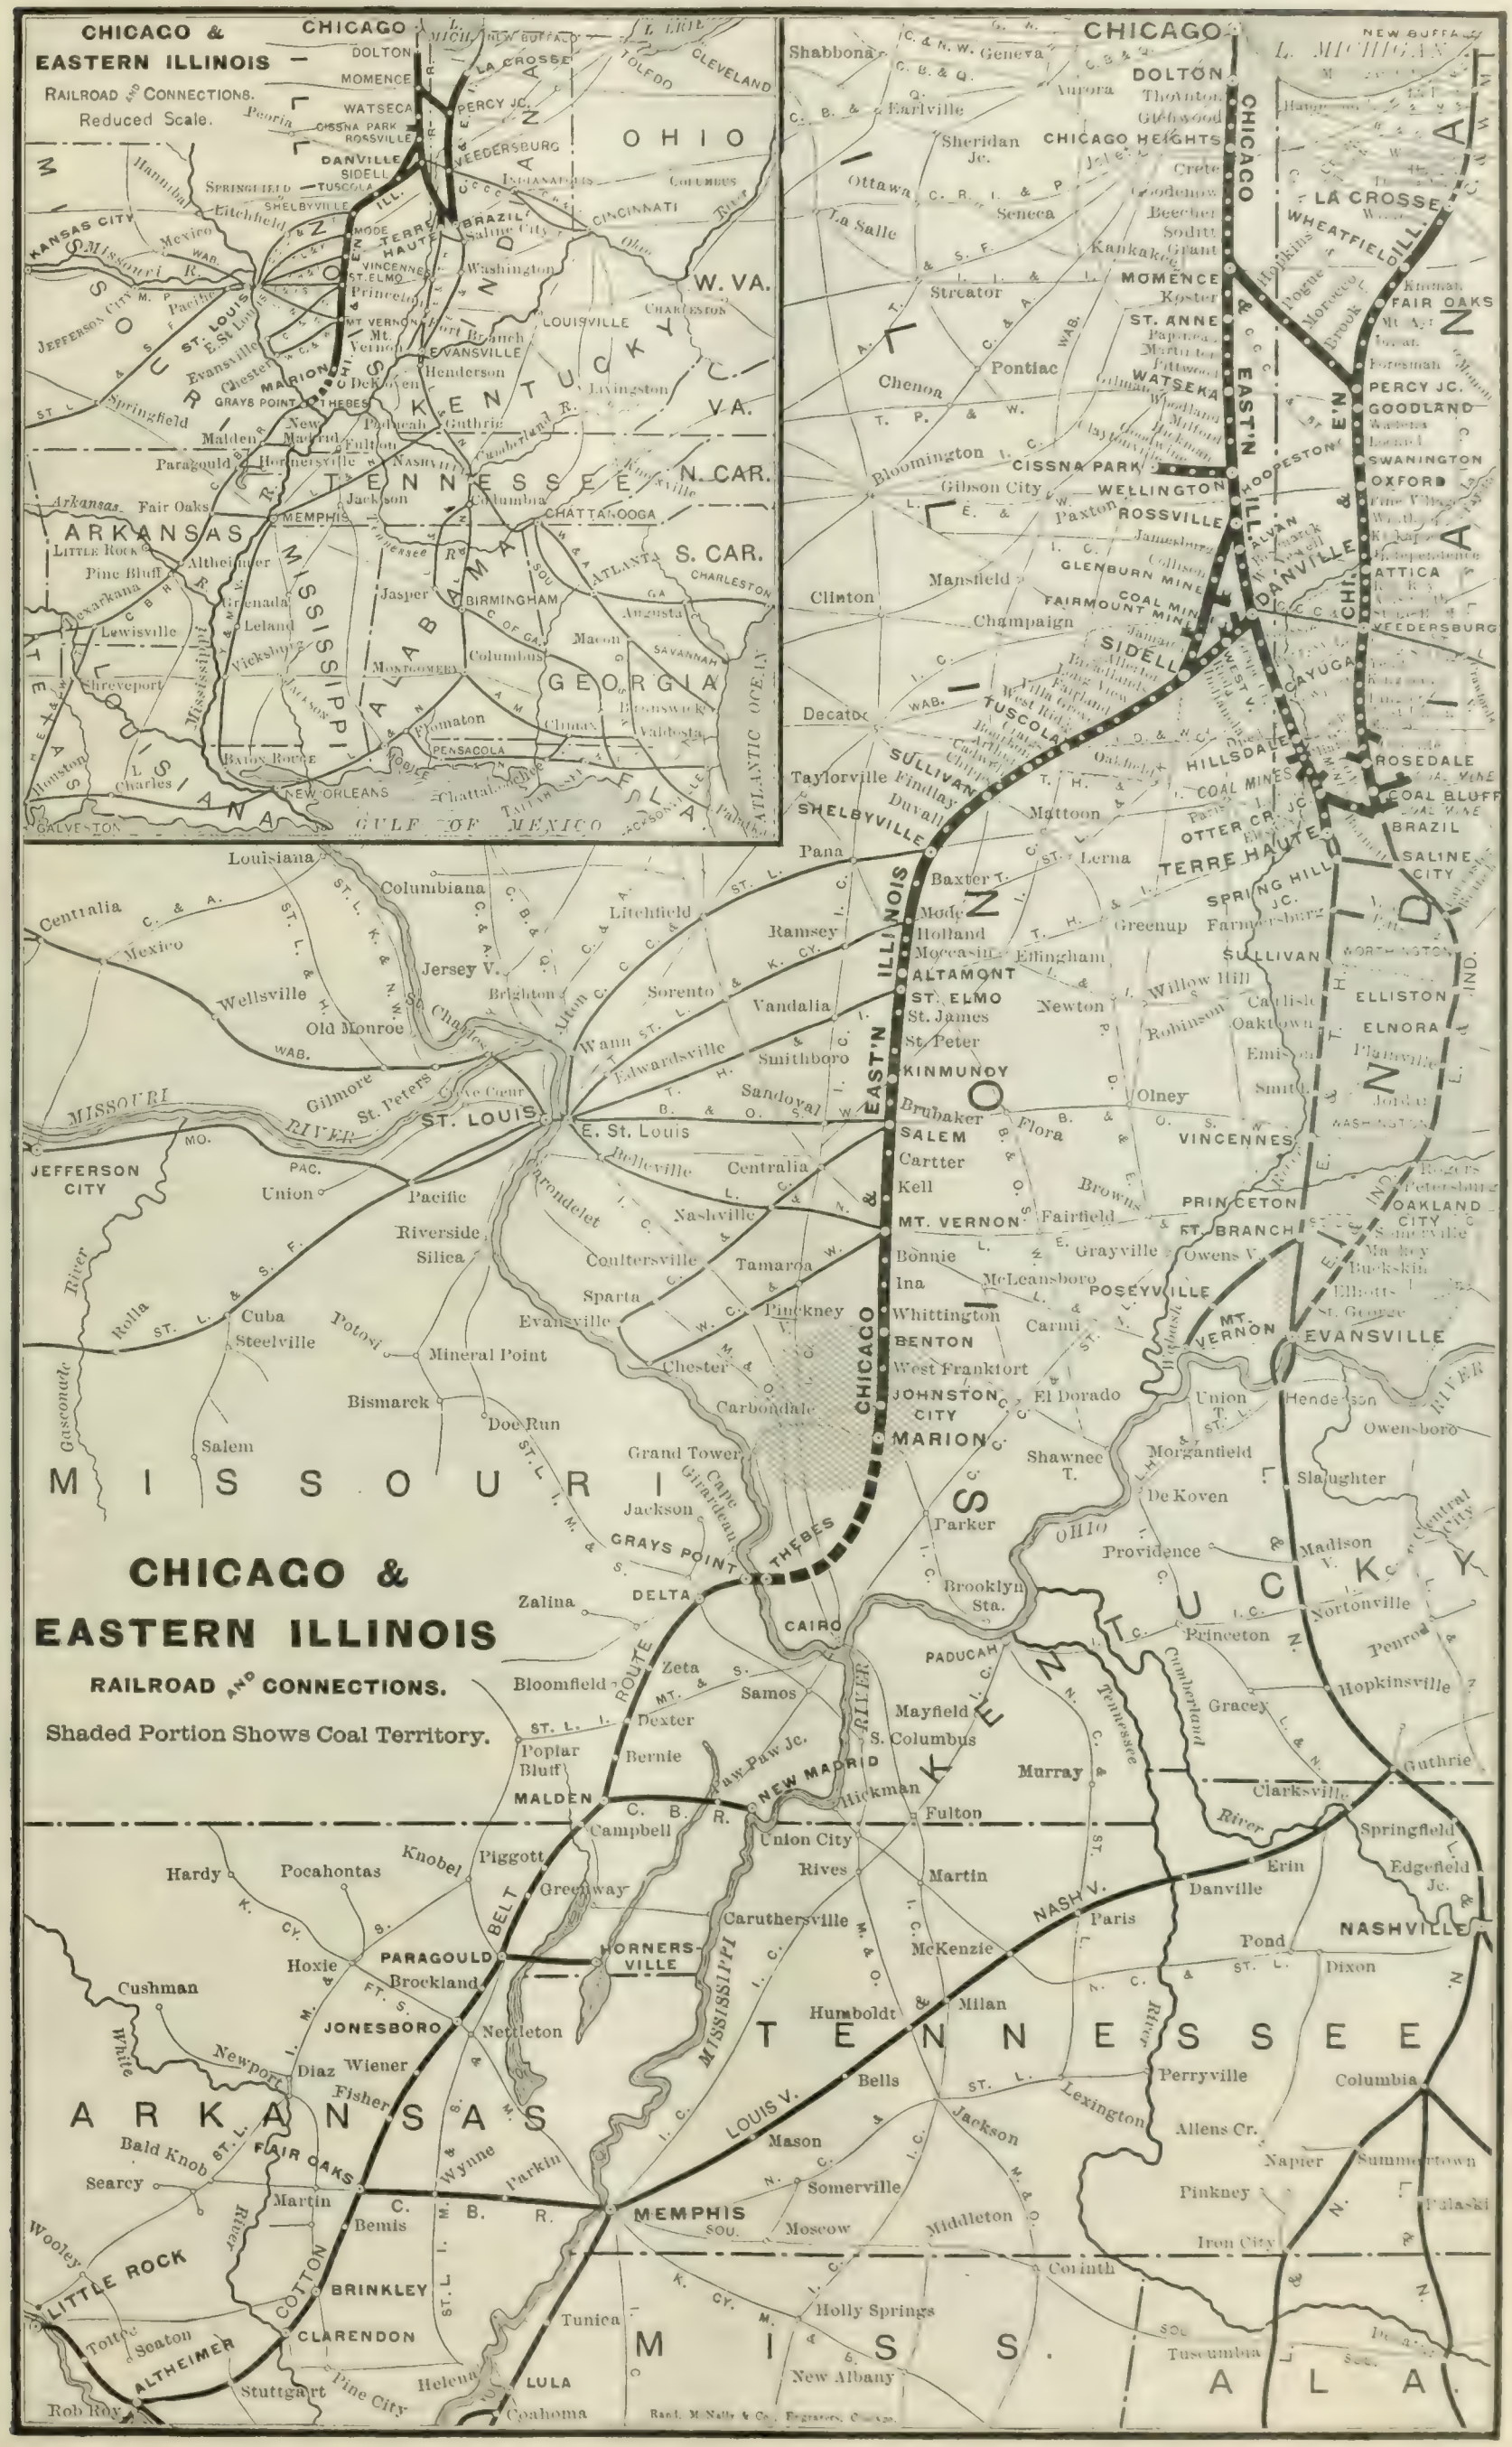
SINKING FUNDS.—Included in the bonds outstanding in the table above are sundry bonds of the company which are held alive and drawing interest for account of the various sinking funds.

BONDS.—For full description of each loan see the editorial article on pages 3 to 6 of SUPPLEMENT of Oct., 1896, and CHRONICLE V. 63, p. 775.



The *mortgage of 1899 for $85,000,000* secures bonds dated July 1, 1899, maturing July 1, 1949, and to bear interest at not to exceed 5 per cent. Such bonds as may be issued bearing 3½ per cent interest will be subject to call at 105 per cent and accrued interest and those bearing interest at less than 3 p. c. at par and interest on any coupon day after thirty years. The issue is limited to $85,000,000, and the lien securing the bonds will become an absolute first mortgage, covering all lines east of the Mississippi River (including the Chicago Burlington & Northern and other lines to be merged), upon the payment of $28,924,000 consolidated mortgage 7 per cent bonds due July 1, 1903, and of $2,320,000 Chicago & Iowa Division 5 per cent bonds due Feb. 1, 1905. Sufficient of the new loan is reserved to take up these $31,244,000 bonds and an additional $16,166,000 were issued in 1899 (with $4,041,500 stock) as below stated, to retire Chic. Burl. & Nor., etc., bonds, aggregating $13,787,500 and costing $14,235,575 and to pay for improvements, etc. The remainder of the loan will be available for additions, etc.—See V. 68, p. 771; *abstract*, V. 69, p. 283; V. 69, p. 795.



The *Iowa Division* bonds are a first mortgage on the main line in Iowa from Burlington to East Plattsmouth on the Mo. River, 278 miles, and on 122 miles of branches; they are also a first collateral lien on 420 miles of branches and 86 miles of second track. These bonds have a sinking fund of 1½ per cent ($203,800) yearly, for which the 4s are subject to call at 100, the 5s at 105. The single main line and branches covered "shall not exceed in the aggregate 900 miles," at $16,000 per mile; on second track (of which Jan. 1, 1897, there were 88 miles) may be issued an additional $14,000 per mile. (V. 65, p. 462.)

The Chicago Burlington & Quincy sinking funds for the several loans respectively held alive June 30, 1899, of the bonds given above as outstanding: Of **g**, $4,714,800 July 1, 1899, and $134,000 additional drawn Jan. 1, 1900; **h**, $1,930,000; **k**, $307,000. Also canceled bonds not included above, **f**, $3,364,000, July, 1899.

Iowa Div. bonds, $56,000 fives and $170,000 fours, have been drawn for the sinking fund and will be paid April 1, 1900. V. 69, p. 1192.

Denver Ext. bonds can be increased only for 2nd track at $10,000 p. m.

The collateral trust *Nebraska extension* bonds of 1887 (New England Trust Co., of Mass., trustee) are issued at $20,000 per mile for single and $10,000 per mile for second track on not exceeding 1,500 miles. **Abstract** of deed V. 45, p. 441.

Burlington & Missouri RR. in Nebraska consol. mortgage of 1878 is for $14,000,000, and is now a 1st M. or 1st collateral lien; all except the $5,000,000 of *exempt* bonds are subject to call for the sinking fund at par, $231,200 having been retired in 1896. The "exempt" bonds may be called after 1908.

The 5 *per cent debentures* of 1890-92 are *convertible* $ for $ into stock any time prior to Dec. 1, 1902, except when books are closed. $11,721,200 had been thus converted up to June 30, 1899. V. 67, p. 842. See terms of conversion on page 5 of the SUPPLEMENT for Oct., 1896.

Many of the bonds are redeemable (may be drawn) before maturity at various prices, plus accrued interest, as stated in the table above.

GENERAL FINANCES.—The Chicago Burlington & Quincy Railroad has been one of the most profitable in the country, as its numerous branches tributary to the main line were built into choice agricultural territory. Corn, however, being one of the principal articles carried by it, its earnings vary greatly according to the size of the crop.

In May, 1899, all of the bonds and most of the stock of the Keokuk & Western RR (which see) was acquired. V. 69, p. 756.

In April, 1899, stockholders subscribed pro rata for $16,166,000 new 3½ per cent bonds at 75, and $4,041,500 stock at par, in blocks of $1,000 bonds and $250 stock, for which $1,000 paid, $500 on June 8 and $500 on Sept. 8. This issue of 3½ per cent bonds is limited to $85,000,000, as above stated, and is designed to retire eventually the bonded indebtedness of all the lines east of the Mississippi River. The lien will become an absolute first mortgage on payment of the consol. 7s and the Chicago & Iowa division 5s. The present issue is made to take up the bonds of Chicago Burlington & Northern RR. and $1,076,000 Ottawa Oswego & Fox River Valley bonds, amounting in all to $13,787,500, at a cost of $14,235,575. The balance is to be used for improvements. Interest on the new bonds began July 1, 1899. See circular V. 68, p. 771; V. 69, p. 751. The C. B. & N. was merged in May, 1899.

The company's sinking funds have received to June 30, 1899 over $19,250,000. With this money about $8,000,000 of the company's bonds have been canceled, while the remainder of the cash not so used has been invested for the benefit of the several sinking fund loans in bonds that are held alive drawing interest and are therefore included in the company's outstanding debt. In 1898-9 the aggregate sinking fund income was $1,143,318, of which $523,619 is the amount carried direct to the sinking fund and the balance appears in the accounts merely as part interest on funded debt.

Debentures aggregating $31,910,900 have been issued; of this amount $9,000,000 was used to purchase the Hannibal & St. Joseph, from which a good income is received, while $7,647,000 was used to buy other stocks and $15,263,900 (since mostly converted into stock) for improvements, etc.

As unencumbered assets, on the other hand, the company owns besides the $14,244,900 Hannibal & St. Joseph stock above mentioned, a large amount of stocks and bonds, a list of the same being in V. 63, on pages 778 and 877. The road unbonded and the roads whose bonds are all owned were in 1898 (V. 63, p. 775), as follows:

	Miles.
Northerly Extension, Alliance, Neb., to Billings, Mont., and branches	621

Other lines of moderate earning capacity (Ch. Burl. & K. C., etc.) securities all or nearly all owned and unpledged	477

LATEST EARNINGS.—From July 1 to Nov. 30 (5 months) earnings, including lines controlled, were:

gives a traffic guarantee of 30 per cent of its gross earnings on interchanged traffic.

REORGANIZATION PLAN.—The plan issued in Nov., 1899 (V. 69, p. 954,) provides for the foreclosure of the first mortgage, due Jan., 1900, and the issue of the bonds shown in the table. The Grand Trunk will give a traffic agreement of 30 per cent of its gross earnings on interchanged traffic to meet the interest on the new 4s and receive the $6,000,000 new stock in re-payment of advances and full satisfaction of the floating debt. The old 1st 6s will receive an equal amount of new 1st 4s (see V. 69, p. 1061,) and the old 2d 5s 75 per cent in new 1st 4s. Of the new bonds, $4,500,000 will be issued for double tracking and other capital purposes and $563,000 will be reserved for Northw. Grand Trunk 6s. Majority of bonds deposited Jan., 1900.

Foreclosure suit was begun Jan., 1900. E. W. Meddaugh and H. E. Joy are receivers. A. Kayser & Co., 21 Cornhill, London, E. C. (Martin's Bank, Lim., depository,) and Simon Borg & Co., New York, represent opposition to plan.—V. 70, p. 39, 75.

The Leavenworth Terminal Ry. & Bridge is used into Leavenworth.

HISTORY.—The Chicago St. Paul & Kansas City was organized in May, 1886, and in December, 1887, merged with Minnesota & Northwestern. In August, 1892, reorganized per plan, Vol. 55, p. 856. Each $1,000 of Minn. & N. W. and Chi. St. P. & K. C. first mort. bonds was given $500 debenture stock and $600 pref. "A" stock.

On Sept. 7, 1893, the Great Western acquired by deed the title of the Chicago St. Paul & Kansas City Ry. (815·67 miles), subject to the mortgage bonds, of which it owns all except $1,000. It also acquired the title to the Leav. & St. Joseph Ry. (23 miles), which is unencumbered.

SECURITIES.—The holders of *debenture* and *preferred A* stock appoint the finance committee, which exercises general supervision of finances. Additional securities of said issues can be put out, but only with consent of a majority of both said classes of stock present at a meeting. Securities of other issues having a lien prior to preferred A can be created, but only with consent of two-thirds of both classes. The several classes in case of liquidation will have principal paid in gold, according to their priority right to dividends. At extraordinary general meetings of holders of debenture stock and preferred A stock collectively, holders of *one-tenth* of said stocks outstanding, present or represented, constitute a quorum and by a majority vote have power to sanction any modification of the rights of said stocks. The provisions of the several classes of stock and of the trust deed were fully set forth in the editorial article of the SUPPLEMENT for October, 1897.

In 1898 the authorized issue of 4 p. c. debenture stock was increased from $15,000,000 to $30,000,000 for future refunding and improvements. See General Finances below.—V. 66, p. 133, 663, 1088.

On New York Stock Exchange in January, 1900, $16,776,500 debenture stock had been listed, including $3,300,000 four per cent debenture stock to retire the $2,823,150 priority loan on Jan. 1, 1900. V. 69, p. 451. Cash interest was resumed on all the debenture stock and *all* the preferred "A" is entitled to cash dividends since July 1, 1899.—V. 67, p. 1206.

DIVIDENDS.—On pref. "A" paid Jan., 1899, 2 p.c.; in July, 1899 2 p. c.; in Jan., 1900, 2½ p. c. (V. 69, p. 1193.)

FINANCES.—The deb. and pref. "A" stockholders voted Jan. 30, 1899, to issue $8,000,000 debenture stock, in order to refund in the near future the following securities: Ch. St. Paul & K. C. 5s, subject to call at 105, $2,823,150; equipment lease warrants, $1,673,000; sterling loan 6s, $1,454,000; gold notes 5s, $1,100,000, and for improvements. V. 68, 186. Of this new stock, $3,300,000 was sold to retire the $2,823,150 priority loan (the only mortgage debt), called and paid Jan. 1, 1900, and no more will probably be issued until 1901, when certain car trusts mature. V. 68, p. 669, 1131. The estimated savings in interest charges will be $91,218 annually. By improvements of the permanent way, etc., operating expenses were reduced in 1898-9 to 67·21 per cent of earnings, against 70·13 per cent in 1897-8 and 77·47 in 1894-5.—V. 69. p. 501.

The main line of the Wis. Minn. & Pac., extending from Red Wing, Minn., to Mankato, 93·7 miles, purchased from the Chic. R. I. & Pac. by friends of the C. G. W. has been operated since June 1, 1899, in connection with the latter, but the earnings kept separate. V. 68, p. 976.

EARNINGS.—Approximate statement for 6 mos. ending Dec. 31, 1899:

HISTORY, &c.—The Milwaukee & St. Paul RR. Co. was organized May 5, 1863, and on Feb. 11, 1874, took its present name. The system has since been greatly extended by the construction and acquisition of other lines. The sale of the Milwaukee & Northern to the St. Paul was ratified in September, 1893. In 1899, all the stock and bonds of the Des Moines Nor. & West, 147 miles, were acquired, the C. M. & St. P. taking possession July 1, 1899.—V. 68, p. 40, 975. Late in 1899 extensions from Rockwell City to Storm Lake, Iowa, 39 miles, and Fonda, Iowa, to Spencer, 44 miles, were opened, and extension of Libertyville line to Fox Lake, Ill., 20 miles, was also almost completed. V. 69, p. 1103. In July, 1899, extension from St. Paul to Duluth was being considered. See V. 69, p. 179. The stockholders voted Sept. 23, 1899, to merge by consolidation the leased lines in Illinois, V. 69, p. 228, 694.

CAPITAL STOCKS.—The preferred stock has a prior right over the common stock to a dividend of not over 7 per cent from net earnings in each year, but if not earned it has no cumulative right. After payment of 7 per cent on preferred and 7 on common, both classes share *pro rata*. Common stock authorized, $47,062,560. Preferred stock on Dec. 31, 1873, was $12,274,483; it has been increased to present figures almost entirely by exchange of convertible bonds for stock, only about $5,000,000 having been issued for other purposes (improvements, etc.) In July, 1899, $15,775,000 prior lien bonds outstanding were exchangeable for preferred.

Also has large interest in Chicago St. Paul Minneapolis & Omaha, 1,538 miles.

Of the mileage shown above as of Jan. 1, 1900, 250 miles were opened on the C. & N. proper since the close of the fiscal year and 48 on the C. St. P. M. & Om., and additional lines were then under construction. The Sioux City & Pacific is to be improved and extended if complete ownership can be obtained.—V. 69, p 1147.

In Oct., 1899, the Boyer Valley Ry., 90 miles, and the Minnesota & Iowa Ry., 119 miles, were under construction, their bonds to be issued at the rate of $16,000 per mile to be guaranteed, principal and interest, by the C. & N., which will probably absorb the roads after completion. In Aug., 1899, the Boone County Ry., incorporated in the interest of the C. & N., had under construction 7 4/10 miles.—See V. 69, p. 290.

HISTORY, &C.—The Chicago & North Western Railway was organized in 1859, and has since absorbed many other roads.

In December, 1882, a controlling interest was acquired in the stock of the Chicago St. Paul Minneapolis & Omaha Co., which see.

In July, 1884, the capital stocks (except a few shares) of the Fremont Elkhorn & Mo. Valley and the Sioux City & Pacific were acquired on the terms stated in the SUPPLEMENT of June, 1885, and prior issues. Their securities, except those held by Chic. & N. W., are in table above.

In December, 1891, the Milwaukee Lake Shore & Western RR. was bought by an exchange of stock. See V. 57, p. 375; V, 56, p. 792.

CAPITAL STOCK.—Of the common stock $2,333,688, and *preferred* $3,795 remained in the co's treasury in July, 1899. Pref. stock has a prior right to 7 p. c.; then common 7 p. c.; then preferred 3 per cent; then common 3 per cent; then both classes share.

BONDS.—*Refunding Mortgage.*—See **Abstract** in V. 65, p. **1175** The authorized issue is $165,000,000 (United States Trust Co., trustee). $131,640,000 are reserved to retire underlying bonds, and remainder for additions and improvements, $4,000,000 at once and $1,000,000 a year thereafter. The bonds may be issued bearing such rate of interest as shall be deemed advisable. See V. 65, p. 1070. The first issue of $20,000,000, bears 3½ per cent (reg. interest Q.—F., coupon M. & N.). V. 65, p. 69, 111, 571. Up to Jan., 1900, $8,858,000 had been listed. V. 67, p. 125.

The *sinking fund bonds* of 1879 are secured by deposit in trust of $15,000,000 of 1st mortgage bonds at $15,000 per mile on subsidiary lines, the most important being described in SUPPLEMENT of May, 1894. Of the sinking fund bonds of 1879 $6,069,000 are 6s; the sinking fund is at least 1 per cent of outstanding bonds, which are subject to call at 105; and through its operation the amount outstanding has been reduced from $15,000,000 to the present figure.

The *sinking fund debentures* of 1933 have a sinking fund of $200,000 per year, if they can be redeemed at 105. These, as also the *debentures* of 1884 and 1891, will be secured by any future mortgage excepting any mortgage "for the enlargement, improvement or extension of the company's property." See description of all the debentures on page 2, SUPPLEMENT of April, 1895. The 25-year debenture mortgage of 1884 was for $6,000,000, but reduced to present figures by sinking fund purchases.

The *extension bonds of* 1886 are secured by deposit in trust of first mortgage bonds at a rate not exceeding $20,000 per mile. Included in the collateral June 1, 1896, were $10,675,000 Fremont Elk Horn & Mo. Valley 1sts and $2,560,000 Wyoming Central 1sts [the Wy. Cent. having been consolidated with F. E. & M. V.], etc. To Jan., 1900, Extension 4s for $18,632,000 had been listed on N. Y. Stock Exchange, of which, July 1, 1899, $1,143,000 were held alive in sinking funds. See F. E. & M. V. bonds below. Union Trust Co. of N. Y., trustee.

The *Fremont Elkhorn & Missouri Valley* consols have a first lien on 1,170 miles (Fremont, Neb., to Deadwood, D. T., 557 miles, and branches to Hastings, Albion, &c., 613 miles), but besides the amount of issue given as outstanding in the table $10,675,000 are held as part collateral for Chicago & Northwestern extension bonds of 1886. The Northwestern assumed $3,600,000 of the Fremont Elkhorn & Missouri Valley bonds and guarantees the rest. See guaranty V. 56, p. 650.

The *Milwaukee Lake Shore & Western* debentures of 1887 were by their terms convertible into M. L. S. & W. stock, but North Western officials state that the bonds are not convertible into North West stock.

LAND GRANT.—Lands and lot sales in 1898-99 $199,192; net cash receipts $602,103; due on contracts of sale, $724,657; lands unsold and uncontracted for May 31, 1899, 647,975 acres.

GENERAL FINANCES.—The first issue of ($20,000,000) refunding bonds at 3½ per cent interest was sold to provide for $18,015,500 old bonds maturing up to Dec. 1, 1902. If the entire issue of $20,000,000 is required to refund these old bonds the saving in interest charges will be about $530,000 per annum—see "bonds" above and V. 65, p. 69, 111. Maple River first 7s for $402,500 fell due July 1, 1897.

In 1898-99 the average freight train load was 208 tons, against 194 tons in 1897-8; rate per ton mile, 0·87 of a cent. In calendar year 1896 of 15,772,642 tons of freight carried, grain furnished 12·73 p. c., coal 12·61 p. c., ores 22·31 p. c. and lumber 6½ p. c.

EARNINGS.—Jan. 1 to Nov. 20, 1899 (11 months), gross, $38,145,209, against $33,878,101 in 1898.

ANNUAL REPORT.—Fiscal year ends May 31. The annual meeting is held the first Thursday in June. The report for 1898-99 was given at length in V. 69, p. 226, 279, 287. See also editorial, p. 259.

HISTORY.—On Dec. 1, 1895, succeeded to the property of the old New York Lake Erie & Western RR. Company, sold in foreclosure on Nov. 6 under its second consolidated mortgage. The new company holds in fee or through ownership of all or practically all the stock of the independent companies, the line from New York to Chicago (including the Nypano RR. and Chicago & Erie companies) and also all branch and subsidiary lines except a few small properties aggregating about 300 miles held under lease. The reorganization **plan** of August, 1895, was given at length in V. 61, p. 368.

In January, 1898, control of the N. Y. Susquehanna & Western was obtained. The road is operated as an independent line. The acquisition will save the Erie considerable double tracking—see V. 66, p. 83 335, 573, and editorial p. 53. See STOCK below.

Nor. RR. of N. J. leased and 4 per cent guaranteed on its $1,000,000 stock in June, 1899.—V. 69, p. 81, 447.

In June, 1899, practically all of the stock of the New Castle & Shenango Valley RR. was acquired. V. 69, p. 447.

COAL AND STEAMBOAT PROPERTY.—The Erie coal properties represent an aggregate of 10,500 acres of anthracite, of which about 9,000 acres are held in fee; also 53,000 acres of bituminous coal lands held in fee 14,000 acres of bituminous held under mineral rights. Its coal tonnage in the year 1898-99 aggregated 11,363,640, out of the 24,916,944 tons hauled. The Union Steamboat Co. has its terminal and other properties in Buffalo and a fleet of eight lake steamers. See V. 63, p. 514.

STOCK.—The *stock* is to be held by J. Pierpont Morgan, Louis Fitzgerald and Charles Tennant, Bart., voting trustees, for five years, and thereafter until the new first preferred stock shall have received 4 per cent cash dividend in one year. In the meanwhile certificates of beneficial interest are outstanding. The new company reserves the right to redeem either class of its preferred stock at par in cash. Provisions of voting trust and preferred stock certificate were given in SUPPLEMENT of April, 1897, page 3.

In March, 1898, Erie pref. stock was authorized to be increased from $30,000,000 to $43,000,000, and common stock from $100,000,000 to $113,000,000, to acquire New York Susq. & Western stock.—See V. 66, p. 335, 573.

BONDS.—New York & Erie first 7s for $2,482,000, due May 1, 1897 were extended for 50 years at 4 p. c., payable p. & i. in gold. V. 64, p 180, 1040. The new first consolidated mortgage is for $175,000,000 [Farmers' Loan & Trust Co. trustee]—see **abstract** of deed V. 62, p. 89 and secures $35,000,000 prior lien bonds and $140,000,000 general lien bonds. Of the $35,000,000 *prior lien bonds*, $5,000,000 are to be used for improvements.

Of the $140,000,000 *general lien bonds*, $91,968,000 are reserved for the ultimate acquisition of all bonds and guaranteed stocks now left undisturbed on various parts of the system [excepting the $1,000,000 seconds on Buffalo & Southwestern—see list V. 62, p. 89], and $17,000,000 are reserved for new construction, betterments, additions, etc., after 1897, under carefully guarded restrictions, not over $1,000,000 to be used in any one year. The general lien bonds bear interest from July 1, 1896, first coupon being January 1, 1897, at 3 per cent per annum for two years and 4 per cent thereafter.

The position of the first consolidated mortgage is substantially as follows: It is a first lien, either by mortgage or collateral trust [the prior lien bonds, however, preceding the general lien bonds] upon the company's principal coal properties, upon its water transportation lines, including valuable terminal properties appurtenant thereto, and upon a number of profitable local lines in New Jersey and near Buffalo; it is a *second lien* upon the remaining coal properties and upon the railroads leading to all the coal properties, upon the terminals at Jersey City, upon the Buffalo New York & Erie Railroad (the main line to Buffalo) and the Buffalo terminal properties other than those upon which it is first lien, and upon the entire line from Salamanca to Chicago; it is a *second consolidated mortgage* upon the lines between Piermont and Dunkirk (446 miles.)

Real estate mortgages outstanding June 30, 1899, $439,500.

Old Bonds—Under the first consol. mortgage of 1895 the company covenants to pay the interest regularly on all the old bonds in the table that are marked with a * or a ‡ (except N. J. & N. Y. bonds,) and to take them up and pledge them with the trustee at maturity.

A description of the *Long Dock* 6s was in March, 1894, SUPPLEMENT under N. Y. L. E. & W. The yearly rental is $450,000.

For *N. Y. Lake Erie & W. Coal & RR.*, see SUP. January, 1895.

FIXED CHARGES.—The fixed charges of the System on completion of the reorganization were reduced from $9,400,000 to $7,860,000 per annum (including prior lien bonds $1,176,000; undisturbed bonds and stock $5,500,000; general lien bonds, $1,184,000) and for the first two years after reorganization there was a further reduction of about $300,000 per annum.

GENERAL FINANCES.—Control of the Northern RR. of New Jersey was purchased in July, 1897. Control of the New York Susquehanna & Western—which see—was acquired in 1898 through an exchange of stock. V. 66, p. 335, 573. During 1898-9 $1,452,000 of the $5,000,000 prior lien bonds reserved for construction and new equipment were sold; also $1,000,000 general lien bonds issued for construction, but held in the treasury June 30, 1899.

Extension of Gt. North. main line was built in 1898 between Fosston and Duluth, 230 miles. V. 67, p. 28, 796. The Spokane Falls & Northern was acquired in 1898 and taken into the system July 1, 1899. V. 69, p. 959; V. 67, p. 30, 179, 797. The Duluth Miss. River & Northern, etc., was purchased in 1899, possession being taken May 1. See V. 68, p. 187, 822, 976. In Sept., 1899, it was reported that an extension was purposed of the Eastern Minnesota line from Milaca, north about 100 miles, to connect with the Dul. Miss. Riv. & Nor.; also a cut off between Libbey Creek and Kalispell, Mont., to extend from Batavia along Libbey Creek to Libbey, about 75 miles.

STOCK, LEASES, ETC.—This corporation in February, 1890, leased the St. Paul Minneapolis & Manitoba for 999 years, assuming its funded debt and guaranteeing 6 p.c. per annum in gold on its $20,000,000 stock.

In 1898 $25,000,000 new Great Nor. preferred, raising the total capital stock to $50,000,000, was offered to stockholders, $15,000,000 of this being sold at par to provide for retirement of $15,000,000 col. tr. 4s of 1892, called for redemption Sept. 1, 1898, and $10,000,000 being exchanged for the $12,500,000 stock of the Seattle & Montana RR., which in June, 1898, had been declared distributable as a 50 per cent dividend.—V. 66, p. 1044, 1188; V. 67, p. 796.

In October, 1898, the stockholders surrendered the right to issue $20,000,000 common stock in addition to the $50,000,000 preferred then outstanding, and made all the stock "of a single class, with uniform rights and privileges." Also authorized the purchase of the $20,000,000 of guaranteed 6 per cent stock of the St. Paul Minneapolis & Manitoba, on the basis of $125 Great Northern stock for each $100 Manitoba stock, thus increasing the Great Northern stock to $75,000,000. In Jan., 1900, $24,409,700 of the increased stock had been issued and leaving not over $472,240 of the Manitoba stock unexchanged.—(V. 68, p. 129; V. 67, p. 1356; V. 67, p. 370, 788, 842.)

In April, 1899, $15,000,000 additional preferred, raising total to $90,000,000, was offered to stockholders at par, to acquire all the bonds, debentures and stock of the Spokane Falls & Nor. Ry., Nelson & Ft. Sheppard Ry, Columbia & Red Mtn. Ry. and Red Mtn. Ry., and $7,500,000 new stock of East Ry. of Minn. V. 68, p. 772, 822, 1181.

In Jan., 1900, $9,000,000 additional stock was offered at par to stockholders to acquire $3,500,000 further stock of the East Ry. of Minn. and $5,500,000 stock of the Willmar & Sioux Falls Ry., which amounts are to be used for extensions and improvements of the respective companies. The acquisition by the Willmar & Sioux Falls Ry. will include the Sioux City & Northern and Sioux City & Western railroads. It was also proposed to offer $1,000,000 to employees at par, thus raising the amount to $100,000,000.—V. 70, p. 39.

LANDS.—Land sales in April, 1897, had retired all the 1st mort. bonds and were then applicable to consol mort. of 1883.

Sales for year ending June 30, 1898, were 120,452 acres for $883,145 and 344 town lots for $16,508. The net amount due on land contracts June 30, 1898, was $1,605,626; lands unsold, 1,308,483 acres.

Minneapolis & St. Cloud grant was 476,864 acres; unsold July 1, 1899, 397,730 acres; sales in 1898-99 were 7,965 acres for $38,483.

BONDS.—St. P Min. & Man. *consol. mort.* of 1883 is for $50,000,000, of which bonds are reserved to pay prior liens. It is a first lien on the land grant and on 670 miles of railway in Minnesota and a second lien on the remaining 1,873 miles in Minnesota and the Dakotas, the prior liens on which average only $7,300 per mile. V. 64, p. 518. *Montana Extension* mortgage is for $25,000,000 for extensions and for second track. **Abstract** V. 45, p. 342.

Pacific extension mort. £6,000,000 provides for bonds at £6,000 per mile in Montana and £7,000 per mile west of Montana; £3,000,000 of this issue, in addition to those given in the table above, were pledged to secure the Great Northern's collateral trust bonds, but were released upon payment of the latter, called for redemption on Sept. 1, 1898. V. 66, p. 1044, 1188. See **abstract** of mortgage, V. 52, p. 82.

Eastern Railway of Minnesota runs from Hinckley northward 70 miles, to a point near Duluth; the first mortgage covers road, equipment, terminals and elevators. The Northern Div. $15,000,000 mortgage of 1898 provides for extension building from Fosston, Minn., to the head of lake navigation at Duluth, and also for future requirements, including the retirement of the $4,700,000 1st 5s at maturity. They are redeemable at 105 on three months' notice after Apr. 1, 1928. —V. 66, p. 471. *Montana Central* bonds cover several roads. (See adv. CHRON. Dec. 12, 1891.) The Manitoba guarantees these issues, and the Great Northern assumes the guaranty.

The *Willmar & Sioux Falls* bonds are endorsed with joint and several guaranty of the Manitoba and Great Northern companies. Further issues may be made at $17,500 p. m. for additional road. V. 56, p. 247.

Minneapolis Western first mortgage is for $1,000,000. V. 60, p. 835.

GENERAL FINANCES.—The preferred stock was increased in 1898-9 from $25,000,000 to $90,000,000— see above and V. 66, p. 1188; V. 67, p. 370, 788, 842, 1003, 1356. V. 68, p. 772. In 1898-99 received $1,250,000 (10 p. c.), in 1897-8, $500,000 (12 p. c.) and in 1896-7, $600,000 (12 per cent), in dividends on Eastern Ry. of Minn. stock.

The Chicago St. L. & N. O. is leased for 400 years from July 1, 1882, at 4 per cent per annum on its $10,000,000 stock deposited to secure the *leased line stock.*

A lease of the St. Louis Alton & Terre Haute system was taken in April, 1896. V. 62, p. 636, 684. In May, 1897, the Chesapeake Ohio & Southwestern and allied lines were merged in the Chicago St. Louis & New Orleans, forming the Louisville Division.

Authorized capital stock increased from $50,000,000 to $60,000,000 in November, 1895; of the $10,000,000 increased stock $2,500,000 was issued at once and $7,500,000 in July, 1899. V. 69, p. 594, 645.

HISTORY, ETC.—Formed in 1887 after foreclosure of the Lake Erie & Western *Railway.* (See V. 50, p. 590.) The terminals at Indianapolis, Peoria, Fort Wayne and New Castle are operated partly under lease. The company lets about 74 miles of trackage and terminal rights receiving about $35,000 yearly. In 1899, control passed to the Vanderbilts and in Jan., 1900, a new directory was elected; the road will be operated as part of the Lake Shore sytem. V. 70, p. 76.

GENERAL FINANCES.—In Jan., 1900, the large floating debt in existence when dividends were suspended in 1899 had all been paid off, about $800,000 had been expended for improvements, and there was $350,000 in the treasury. The road earned in 1899 more than a million dollars in excess of fixed charges, and this surplus, together with the proceeds of sale of the Pittsburg & Western 2ds to B. & O. interests, and of stock in the Cleveland Akron & Columbus RR and the right of way, etc., of the abandoned Cleveland & New Castle project to the Pennsylvania system, produced this marked change in the company's financial condition.

The consol. mortgage of 1897 (United States Trust Co., N. Y., and John T. Dye of Indianapolis, Ind., trustees,) is for $50,000,000 of 3½ per cent gold bonds, tax free, authorized to retire the several issues of 7s maturing from 1898 to 1903 (see **abstract** in V. 64, p. 1182) amounting to $43,192,000, and the balance, $6,808,000 for use in refunding said bonds and for general purposes of the company. The mortgage covers 829·54 miles of main line and branches—a considerable portion being double tracked—and 181·11 miles of leased lines. The refunding of the first 7s into new 3½ per cent consols will effect a saving in interest charges, when entire $50,000,000 are outstanding, of $1,273,440 a year. See refunding plan in V. 64, p. 469, 610 and also V. 66, p. 82; V. 67, p. 956. To June, 1899, $30,542,000 of 3½s had been listed.—V. 66, p. 1140; V. 68, p. 1182.

GUARANTIES.—As to guaranties additional to those shown in table above see Detroit Hillsdale & S. W. and Fort Wayne & Jackson.

GENERAL FINANCES.—Nothing has been charged to construction or equipment account since 1883, the outlays charged to operating expenses for new equipment amounting in 1898 to $699,516, and in 1897 to $349,280 and for construction to $108,908 in 1898, against $245,179, these items being exclusive of expenditures for renewals. Profit and loss surplus Jan. 1, 1899, $7,350,713. Low grades permit large train loads; average for 1898, 352 tons, against 321 in 1897.

In Dec., 1899, $27,341,000 of the $43,192,000 7 per cents due in 1903 and earlier, and outstanding in June, 1897, had been retired and $31,387,000 new 3½s issued, thus reducing fixed charges $815,325 per annum, or over 1½ per cent on the capital stock.

In Feb., 1898, a majority of the capital stock was purchased by the N. Y. C. & H. RR., which gave in exchange its 3½ p. c. bonds at the rate of $200 in bonds for $100 in stock, and offered to take the minority interest on the same terms. V. 66, p. 288. In Dec., 1899, $45,284,600 stock had been exchanged. V. 69, p. 1237.

Pensacola & Atlantic first mortgage bonds (assumed) are gradually being called for the sinking fund at 110; on June 30, 1899, $843,000 were held in the treasury, making total outstanding $1,910,000.

St. Louis terminal property bonds cover freight terminals.

The *collateral trust bonds* of 1898 (see below) are secured by deposit with the U. S. Trust Co., as mortgage trustee, of $14,000,000 L. & N. unified 4s and $4,000,000 L. & N. Paducah & Memphis division bonds, the latter covering the road from Paducah, Ky., to Memphis, Tenn., 254 miles. The loan is limited to $12,500,000, and is subject to call at par on and after April 1, 1903. (V. 66, p. 337; V. 68, p. 87.)

GUARANTIES.—Besides bonds in table, the Louisv. & Nashv. is responsible for $2,100,000 bonds and dividends on $2,305,582 stock of Nashville & Decatur; and for $2,096,000 Nashville Florence & Sheffield bonds.

GENERAL FINANCES.—In 1898 sold $12,500,000 collateral trust bonds, due in 20 years but subject to call on or after April 1, 1903, deferring sale of L. & N. 4s for better prices. V. 67, p. 742. This transaction reduced interest charges (includ. int. on floating debt) about $200,000 yearly. As a result of refunding there was on Dec. 31, 1898, no floating debt, a cash surplus of about $2,000,000 and stocks and bonds in treasury worth $9,000,000 to $10,000,000. (V. 66, p. 337, 574; V. 68, p. 85.) Since July 1, 1894, the "construction account" has been closed, and in the five years ending June 30, 1899, $2,621,230 had been charged to operating exp. for permanent improvements. In Feb., 1899, dividends resumed (Feb. 1½%). V. 68, p. 85. In Aug., 1899, 2 p. c was paid. V. 69. p. 130. In Jan., 1900, 600,000 acres of land in Western Florida, acquired through Pensacola & Atlantic RR., were sold for $600,000. V. 70. p 39.

On May 26, 1899, the Louisville & Nashville and Southern Ry. acquired the Birmingham So. RR. for $1,100,000. V. 68, p. 774, 1078.

EARNINGS.—For half-year ending Dec. 31 (partly estimated):

Manhattan Ry. (Elevated).—ROAD—Owns all the elevated railroads in N.Y. City, main track, 32 miles; also Suburban R.T.RR., 3¾ m. In Oct., 1899, extension of about 2 miles proposed from terminus of 3d avenue line at 177th Street to Bedford Park. V. 69, p. 852.

HISTORY, ETC.—Formed Nov. 24, 1875.

STOCK.—Increased in March, 1899, from $30,000,000 to $48,000,000 to meet cost of electrical equipment, etc.—V. 68, p. 232, 282, 380, 428, 617.

BONDS.—*Consolidated mortgage* (trustee, Central Trust Co.) is limited on present mileage to $40,000,000, and will provide for prior bonds when due. Amounts beyond $40,000,000 may be issued for extensions at the rate of $300,000 per mile of single and $600,000 per mile of double track. (See abstract of mortgage in V. 51, p. 248, and application to New York Stock Exchange in V. 52, p. 353.) Of the consols the company itself in Dec., 1897, held $300,000 against "special account" and $50,000 consols to redeem convertible cert.—V. 69, p. 131.

GENERAL FINANCES.—See V. 68, p. 232, 282. To May, 1898, claims aggregating $8,847,854 had been paid by the company as damages to abutting property and other cases were before the courts. See CHRONICLE, V. 66, p. 954, and V. 67, p. 789. As to personal property tax assessment, see V. 66, p. 954; V. 67, p. 222, and V. 68, p. 1282. Amount of taxes in litigation Dec. 31, 1898, per balance sheet, $1,164,259. V. 67, p. 1053. Of the proceeds of the $18,000,000 increased stock $6,000,000 had, in July, 1899, been used to pay the old right of way judgments.—V. 69, p. 131. Most of the remainder, along with other funds (in all $13,627,404 on Sept. 30, 1899), was loaned out on collateral, yielding the company a substantial revenue to offset the deficit for the year 1898-99; see V. 69, p. 1062.

The electrical equipment of the system, it is expected, will be effected in 1900. V. 69, p. 1148. The new method of operation is expected to increase the efficiency and economy of the service and net earnings of the system and place the stock, as increased to $48,000,000, upon a 5 per cent basis. See "stock" above. Has traffic agreement (since April 29, 1899), with Third Avenue RR. system providing for transfers to and from both lines.—V. 68, p. 672. The refunding of $4,000,000 Met. El. 2d 6s into consol. 4s Nov. 1, 1899, effected a saving of $80,000 annually.—V. 69, p. 852.

In Nov., 1899, location for power house had been secured at 74th St. and East River, and all contracts let.—V. 69, p. 27, 131, 955, 1148.

CANADA SOUTHERN CONTRACT.—In Nov., 1882, a close contract was made with Can. So. for the operation of its road. The contract provided for a re-apportionment every five years and in the re-apportionment December, 1892, it was agreed that the Canada Southern should thereafter receive 40 per cent and the Michigan Central 60 per cent of the first $1,000,000 of net earnings, any amount over that to be divided as theretofore—one-third to C. S. and two-thirds to M. C.; but under the original contract each company is accorded all benefit from reduction in its fixed charges. The M. C. to Jan. 1, 1899, had reduced its charges $328,575; this sum is therefore credited to it before the division.

CAPITAL STOCK.—The stock has remained at same amount since 1895.

DIVIDENDS. Per cent— '83 5 '84 3 '85-86 nil. '87-89 4 yearly '90 5 '91 5 '92-94 5½ y'rly '95 to Jan.,'00 4 yearly

BONDS.—The *Jackson Lansing & Saginaw bonds* were assumed by Michigan Central, which also guarantees in perpetuity 3½ per cent on the stock. The *Bay City & Battle Creek* mortgage is for $1,800,000, but amount outstanding is limited to $15,000 per mile. The total issue of *Battle Creek & Sturgis* bonds is $500,000, but of this $79,000 was sub-guaranteed by the Lake Shore & Michigan Southern, 7 miles of the B. C. & S. being operated by that company The Bay City & Battle Creek and the Battle Creek & Sturgis issues both carry the guaranty of the Michigan Central endorsed on the bonds.

OPERATIONS, &C.—The road is operated under a close contract with Canada Southern, and the earnings of both roads are included in the statistics below. As to division of profits between the companies, see explanation V. 64, p. 5. All betterments and improvements to the road have been charged to operating expenses, except $70,000 set aside out of net revenue of 1898 as a special fund for construction of second track between Ypsilanti and Dexter.

In 1898 purchase was arranged of the capital stock by the N. Y. C. & H. R. RR. Co., which gave in exchange its 3½ per cent 100-year gold bonds at the rate of $115 in bonds for $100 in stock. V. 66, p. 759. In Dec., 1899, $16.189,600 of the $18,738,000 stock had been acquired by the N. Y. C. & H. R. RR. V. 66, p. 1238.

HISTORY, &c.—Control of the Lake Shore and Michigan Central roads was acquired in 1898, as stated below. In 1898-9 their earnings were reported separately, but the $3,810,874 dividends on their shares held by the Central caused the large increase in the item "other income," offset by a like amount of interest on the collateral bonds issued for their purchase. V. 69, p. 495.

In Jan., 1900, it was announced that control of the Lake Erie & Western had been acquired on behalf of the Lake Shore & Mich. So., and that the Vanderbilt interest in the Cleve. Cin. Chic. and St. Louis had been increased to an absolute majority; an understanding also was reported between the Vanderbilt and the Pennsylvania interests, by which, it was said, the latter became jointly interested in the stock of the Ches. & Ohio Ry.—V. 70, p. 76, 125.

The Boston & Albany RR. will be leased for 99 years from July, 1900, at a guaranteed rental of 8 per cent per annum on the $25,000,000 B. & A. stock in quarterly instalments, adding 389 miles and a through line to Boston to the Central system [unless Mass. Legislature interferes] V. 69, p. 78, 492, 695; see also V. 69, p. 178, 228, 333, 694.

STOCK.—Dividends on stock registered in London are payable in gold at 49½d. to dollar. The $15,000,000 additional stock, to be issued April 2, 1900, for new rolling stock, will increase the outstanding issue to $115,000,000.—V. 69, p. 906, 1103, 1248.

BONDS.—Description of debentures was on page 3 of SUPPLEMENT of April, 1895. They are all secured by the refunding mortgage of 1897 equally with the 3½s. *Ref. mortgage* is for $100,000,000, of which $70,377,333 reserved to retire all existing bonds at or before maturity and $14,622,667 for premiums; the remainder ($15,000,000) is reserved for new construction after 1903. In 1899 3½s of 1897 had been issued to retire $26,893,912 of old bonds.

Collateral trust 3½s of 1898 are secured respectively by deposit in trust with the Guaranty Trust Co., mortgage trustee, of stock of the Lake Shore & Michigan Southern and Michigan Central RRs. at the rate of $100 of L. S. & M. S. stock for each $200 of bonds and $100 of Mich. Cent. stock for each $115 of bonds outstanding. The total authorized issues of 3½s are $100,000,000 for Lake Shore and $21,550,000 for Michigan Central. The loans are secured by separate deeds of trust. See V. 66, p. 288, 336, 760, 811.

The N. Y. Cent. will issue in 1900 $5,500,000 in its 100-year 3½ per cent debentures for certain property not included in the Boston & Albany lease. See V. 69, p. 1102.

GUARANTIES.—The company guarantees the securities of its leased lines to a considerable aggregate—see separate statement for each company marked with a ¶ in the table of mileage preceding. It also guarantees Western Transit Co. 4½s for $1,000,000 due February, 1903.

GENERAL FINANCES.—The refunding of the $70,377,000 of old high-interest-bearing bonds into the 3½s of 1897 during the years 1898 to 1905 will effect a saving of $1,200,000 per annum in interest charges; to June 30, 1899, about $27,000,000 old bonds had thus been retired; saving in charges by refunding in 1898-9, $437,342.—V. 69, p. 495.

In Dec., 1899, the company had acquired $45,284,600 of the capital stock of the Lake Shore road in exchange for 3½ p.c. bonds (see above), leaving $4,181,900 afloat, including $533,500 guaranteed 10 per cent dividends (see V. 66, p. 288, 336, 1238), and also $16,189,600 of Mich. Central stock, leaving $2,548,400 still outstanding.

On April 2, 1900, $15,000,000 stock, to be sold to stockholders at par, will be issued for new equipment. V. 69, p. 906, 1103, 1248. On July 1, 1900, Boston & Albany RR. (which see) is to be taken over under lease.

The Prior Lien bonds if issued will be retired at 105 by sale whenever possible of first consols at or above 95. Undisturbed bonds which cannot be taken up at maturity on satisfactory terms by use of the consols reserved for that purpose may be extended or renewed. See **abstract** in V. 64, p. **376**. The original Northern Pacific Company was chartered by Congress July 6, 1864; 450 miles to Bismarck were foreclosed in 1875. On Feb. 1, 1898, took over Seattle & International, and in July, 1898, the Washington Central under lease (V. 66, p. 856), and in February, 1898, purchased the entire capital stock and all of the income bonds of the Washington & Columbia River Ry. See separate statements for these Washington companies. All, or substantially all, of the securities of the Seattle & International Ry. are owned.

VOTING TRUST.—Both classes of stock (except sufficient to qualify directors) are vested until Nov. 1, 1901 (unless surrendered earlier at their discretion) in following voting trustees: J. Pierpont Morgan, August Belmont, Johnston Livingston, Charles Lanier, all of New York, and Georg Siemens of Berlin. Provisions of voting trust and of preferred stock were in SUPPLEMENT of April, 1897, page 4.

STOCK.—The new preferred stock is subject to call in whole or in part, at par, upon any first day of January prior to 1917.

Additional preferred stock and other mortgages can be issued only with consent of a majority of the preferred and of the common stock represented at a special meeting. Pref. stock is "entitled to non-cum. dividends to the extent of 4 per cent per annum, payable quarterly out of surplus net earnings in each fiscal year before any dividends for such year shall be paid on the common stock." In any fiscal year in which 4 per cent dividends shall have been declared on both preferred and common stock, all shares, whether preferred or common, shall participate equally in any further dividends for such year. In 1898 $3,000,000 was set aside as a reserve fund until the end of 1901 to ensure the continuity of dividends on preferred. V. 67, p. 588—see also p. 579. Dividends upon stock registered in Berlin may be collected there at the rate of 4·20 marks per $.—V. 63, p. 1071.

Total system July, 1899 (2d track 446 miles), 1,456·5. The Wilmington & Northern, 88 miles, has been leased for 999 years from Feb. 1, 1900, practically all its stock having been acquired. V. 67, p. 843, 1218; V. 70, p. 126. (¶ See this company.)

ORGANIZATION.—The Philadelphia & Reading RR. (chartered April 4, 1833) and the P. & R. Coal & Iron Co. were sold in foreclosure Sept. 23, 1896, and reorganized per **plan** in V. 61, p. 1109.

In the reorganization the 41 millions of old stock and the 56¾ millions of old preference income bonds were assessed 20 per cent, the stock then receiving 100 per cent in new common and the preference incomes, common and preferred stock in certain proportions.

The "Reading Co." in the reorganization of 1896 acquired the security holdings, real estate, equipment, etc., of the old Phila. & Reading RR. Co.; also $20,000,000 stock and $20,000,000 bonds of the Phila. & Reading Ry. and the $8,000,000 stock of the Coal & Iron Co., and against all this property issues its own securities. See V. 64, p. 709.

The property of the Reading Company, as distinguished from the property of the Phila. & Reading Ry. Co. (which owns the railroad but no equipment), and of the Coal & Iron Co., consists of the following:

Railway equip. leased to Ry. Co. for 8 p. c. yearly.....	$18,110,041

Total July 1, 1899. (See V. 69, p. 801).....	$207,888,664

VOTING TRUST, ETC.—All classes of stock of the new company are to be held by voting trustees (J. Pierpont Morgan, Frederic P. Olcott and Henry N. Paul) for five years, and thereafter until 4 per cent cash dividend per annum shall be paid on the first preferred stock for two consecutive years, though the trustees may in their discretion surrender the stock at an earlier date. As to stock privileges see V. 64, p. 709. See copy of **voting trust agreement** V. 64, p. 955, and also SUPPLEMENT of April, 1897, page 5.

BONDS.—The *New General Mortgage* 4s (**abstract** V. 64, p. 612) are secured by mortgage and pledge of all properties and securities embraced in the reorganization, and also all other property acquired thereafter by use of the new bonds. They will have a sinking fund out of the revenues from the Coal & Iron Company, but are not subject to compulsory redemption prior to maturity. The new mortgage is also, subject only to the bonds for which reservation is made, based upon properties or securities of all the lines of railroad owned, including the Philadelphia & Reading Railway Company proper, 391 miles; various leasehold lines, 597 miles; all the property of the Coal & Iron Company, or the securities thereof, representing nearly 200,000 acres of coal and timber land; equipment valued at about $12,000,000, previously subject to about $5,000,000 of car trust obligations [acquired under the plan[and also the marine equipment.

Furthermore, it has a first lien upon a majority of the capital stock of various companies in the system owning 448 miles of railroad, of which 195 miles are leasehold lines included in the 597 miles above stated, and also on bonds of roads in the system (other than the P. & R. Ry. Co.) amounting to $34,265,936 par value. The securities are said to have earned in 1894-95 an income of $585,000, of which $448,000 was received as dividends—list in V. 64, p. 613.

The new mortgage is for $135,000,000, issuable only as follows:

To take up undisturbed bonds of the Reading RR. and Coal & Iron Co.....	$64,631,000
For future construction, equipment, etc., at not over $1,500,000 per annum under stringent provisions.....	20,000,000
Issued at once for reorganization purposes	50,369,000

Improvement mortgage 6 p. c. bonds of 1873 due Oct. 1, 1897, were extended at 4 p. c. for 50 years from April 1, 1897, payable in U. S. gold and guaranteed p. & i. by the Reading Co. V. 64, p. 470; V. 65, p. 516. The *consol* 5s of 1882 for $5,673,042 were also extended at 4 p. c. till Mar. 1, 1937, the Reading Co. and Coal & Iron Co. becoming responsible. See V. 65, p. 870, for contract. V. 65, p. 152, 870.

The *terminal mortgage bonds* are Reading RR. bonds, and are secured by a mortgage upon all the property of the Terminal Co. and by a traffic contract between Reading and the Terminal Co. The trustee is the Provident Life & Trust Co. of Phila. Amount authorized, $8,500,000. See description in V. 64, p. 85 and guaranty V. 60, p. 732.

For *ten-year sinking fund loan* see January, 1895, SUPPLEMENT.

The *coal trust certificates* under agreement of May, 1895, are not redeemable until April, 1904—see V. 63, p. 838 and Jan., 1895, SUPP.

As to *Philadelphia Subway Loan* the receivers were authorized in June, 1894, to pay interest (and principal at maturity) of not exceeding $3,000,000 out of a total issue of $6,000,000 of 3 to 3½ p. c. bonds of City of Philadelphia, to abolish grade crossings. The amount outstanding may be increased to this figure on completion of the subway. Principal is payable after ten years from date of loan in 20 annual instalments. See V. 58, p. 1110; V. 62, p. 950; V. 63, p. 881.

As to the outstanding old bonds (see V. 64, p. 619), the Reading Company and the Coal & Iron Co. covenant to pay their interest when due and to pay or extend their principal at maturity.

The $3,600,000 car trusts of 1899 cover 2,500 wooden coal cars, 1,000 gondola cars, 30 passenger coaches, 30 locomotives, 500 box freight cars and 200 refrigerator cars, the semi-annual payments being met from the renewal fund.—V. 69, p. 1346.

Coal lands owned (acres)....	95,144	Timber lands owned (acres)	70,489
Coal lands leased (acres)....	7,429	Iron ore lands (acres).....	21,000

GENERAL FINANCES.—Application to N. Y. Stock Exchange to list general mortgage bonds was given in full in V. 64, p. 709.

In Jan., 1899, the N. Y. Stock Exchange listed $1,952,000 additional gen. 4s, of which $452,000 to redeem old bonds and $1,500,000 for improvements, making total to that date $62,456,000.—V. 68, p. 188.

LATEST EARNINGS.—From July 1 to Nov. 30 (5 months) results were as follows on basis of present charges in both years:

ORGANIZATION.—Organized under laws of Kentucky, and known as the "Huntington" lines, Mr. C. P. Huntington being President. Under plan for readjustment of Central Pacific securities, the Southern Pacific in 1899 acquired the entire capital stock of the Central Pacific. See that company's statement; also see below.

PROPRIETARY LINES.—These, with a total mortgage indebtedness June 30, '99, of $141,837,218, are mostly owned—only $7,464,283 out of their total stock of $185,772,072 not being held on July 1, 1898, by the Southern Pacific Co. "OMNIBUS LEASE," see SUP'T of Jan., 1899.

STOCK, ETC.—Total stock authorized, $200,000,000, including $67,274,200 exchanged in 1899 for Central Pacific stock—see Central Pacific and V. 68, p. 378, 725; V. 69, p. 132. July 1, 1899, bills payable, $650,000.

In Nov., 1899, the syndicate headed by Speyer & Co. arranged to acquire the holdings of the Crocker and Stanford estates, aggregating alone $56,000,000, which, together with other stock controlled by the syndicate and those friendly to it, including C. P. Huntington, represents a controlling interest.—V. 69, p. 1063.

BONDS.—The fifty-year 4 per cent collateral trust gold bonds authorized by the Southern Pacific Co. in 1899, in connection with its acquisition of the stock of the Central Pacific, are for the total authorized amount of $36,819,000, and are subject to call at par on six months' notice. The first issue of $28,818,500, secured by the $67,274,200 common and $12,000,000 preferred stock of the Central Pacific, was issuable forthwith. The remaining $8,000,000 can be issued from time to time only as an equal amount of Central Pacific preferred is received and added to the collateral, $5,000,000 of this stock being reserved for improvements and additions on the Cent. Pac. at not exceeding $200,000 yearly—see Cent. Pac. and V. 68, p. 378. See Mortgage Abstract, V. 69, p. 859.

The new first refunding 4s and 30-year gold 3½s issued by the Central Pacific are unconditionally guaranteed, principal and interest.

GENERAL FINANCES.—The interest on funded debt for 1899-1900 will not be materially increased over that of 1898-9 by the C. P. readjustment. Interest charge in 1898-9 was $12,888,337; estimated charge for 1899-1900, after deducting $709,070 income on securities in Cent. Pac. sinking funds, primarily applicable to payment on Cent. Pac. 3½ per cent bonds, $13,347,820. Against the last-named amount the So. Pac. Co. will be entitled from Aug. 1, 1899, to dividends on $12,000,000 Central Pacific 4 per cent preferred and $67,275,500 common stock.—V. 70, p. 83.

It also covers further notes or contracts for lands sold aggregating $5,948,944, and the lands for which, if not paid for, revert to the company. See V. 67, p. 791. Its bonds bear 6 per cent interest till August 1, 1900, then 8 per cent till maturity. Entrance to Chicago is secured over the Chicago & West Indiana, of whose stock this company owns $1,000,000.

In March, 1898, leased from Grand Trunk for long term joint use of its railroad between Windsor, Ont., and Black Rock Station, 4 miles from Erie Station at Buffalo, and also between Welland Junction and Suspension Bridge, N.Y. Erie tracks are used into Buffalo. V. 66, p. 812.

The *first mortgage* covers all the lines owned both east and west of the Mississippi at time of reorganization (1,545 miles), and enough bonds are retained to retire the prior liens on roads west; but the *second mortgage* covers only lines east of the river at time of organization in 1889, 1,012 miles. As to the Compton decree ($339,929 with 6 p. c. from May 1, 1888,) see V. 65, p. 926; V. 66, p. 39. Of the *debenture mortgage* bonds, $3,500,000 are series A (preferred in respect to interest payments only) and $26,500,000 series B. Series "A" received 6 per cent interest in 1890; in 1891, 6; in 1892, 6; in 1893, 6 per cent; in 1894 and 1895 none; in 1896, 1 per cent; 1897 to 1899, none; 1900, Jan., 3 p c., and 3 p. c. expected to be paid July, 1900.—V. 69, p. 1104, 1347; V. 66, p. 1142 and V. 67, p. 1358.

The *Detroit & Chicago Extension* bonds cover 150 miles, completed in May, 1893, from Montpelier, Ind., to Clarke Junction, 26 miles, from Chicago. Mortgage is for $3,500,000; abstract in V. 54, p. 1049.

The *Des Moines Division* bonds of 1899 ($1,800,000 authorized) cover 95 miles, equipment costing $250,000, etc. See full description in V. 68, p. 574, and advertisement in CHRONICLE of March 18, 1899; also V. 69, p. 335, 796, 1248.

In March, 1898, began running trains into Buffalo, N. Y., using 246 miles of Grand Trunk Ry. under joint trackage agreement. The Wabash Co. will pay the Grand Trunk a rental commencing at $275,000 per annum, to be increased at the end of every five years by $25,000 a year, until it reaches a maximum of $350,000 per annum. The Wabash will also pay its quota of the cost of operating and maintaining the joint section. (See V. 66, p. 812.) The new equipment required for this connection was to be acquired with car trusts. V. 69, p. 550.

In Nov., 1899, the surplus for 1899-1900 was expected to be sufficient to provide not only the 6 per cent on the "A" bonds but leave something for the "B" bonds.—V. 69, p. 1104.

The authorized issue of consols is $15,000,000, but those unissued are in reality unavailable, since by the terms of the agreement just mentioned they would not if issued be entitled to stand ahead of the consols owned by the Central of N. ENLARGING YARD AND TERMINAL FACILITIES.

Those who follow the railroad news of the day must be struck with the activity of the railroads in providing new facilities for the movement of their traffic. To the casual observer, this result may seem to be effected chiefly through additional motive power and reductions of grades. These are among the essential means, of course. Further study, however, will develop the fact that railroad operating officers are very generally enlarging the capacity of their yards and terminals to meet the demands of a constantly increasing business. It is not always the railroad with the lowest grades and the heaviest or most ample equipment that moves its traffic most promptly. Often this claim may be made by a road with well located and ample yards and alert management, which is resourceful in getting its cars over the road to their destination promptly and then returned with the least delay. A management which does this is pretty sure to arrange to have a full equipment, but if it is not able to secure that, it makes up as best it can for much of the deficiency, which otherwise might be serious. One important way in which this is done is by avoiding delays in yards. It may be noted, however, that very few companies are not carrying out, at some point along their lines, extensive additions to their yard facilities, or adding to their terminals.

This movement has been particularly noticeable at New York, where it might be supposed that adequate terminals were long ago provided. Growing business has made extensive improvements necessary in recent years. The Pennsylvania, Jersey Central, Erie and Lehigh Valley, have each spent heavy sums of late on their New York terminal facilities, and the expenditures are by no means over. The Delaware Lackawanna & Western is re-arranging its Hoboken terminals to enlarge their capacity, and has been buying land at other points on New York harbor for new freight receiving stations. The Lehigh Valley has just leased a valuable tract of land on the East River in New York, to be utilized as a yard, so that a saving in time may be made over the present method of loading and unloading freight. The Philadelphia & Reading is expending large sums in re-arranging its freight terminals at Philadelphia, and the Baltimore & Ohio is building immense new coal piers, warehouses, etc., at Baltimore, to give larger capacity for the prompt shipment of its traffic. These are but a few instances of improvements of a similar nature which are likely to grow more important in the future, as the need of providing for the heavier business of the railroads becomes still more imperative. Not many people recognize how much has been done within a comparatively short time to improve the passenger terminals of the railroads. Millions of dollars have been thus spent in a very few cities. Costly stations have been built at Boston, Philadelphia, Indianapolis, Jersey City, Montreal; Columbus, Ohio; Albany, Portland, Maine; Portland, Oregon; and many Western cities.

Frequently the most difficult problem in building such new terminals has been the arrangement of the terminal yards. These must be most carefully designed to facilitate the movement of trains. The problem, however, is much more serious in designing freight yards. In fact there have been few freight yards which have seemed to thoroughly meet the conditions that have had to be met. The situation of the land, its grades, the shape of the plot, or some other matter, has often hampered the design, so that freight yards which are deemed thoroughly satisfactory and suitable as models to be duplicated are very few. Yet yards, as now laid out, are almost as much better fitted to their purposes than those of ten years ago as the freight cars which use them. With all that, the theory of the proper design of freight yards for given conditions has advanced insufficiently. Yet, as indicated above, it is one to which the railroads are forced to give increasing and serious attention in order to move their enormous business promptly. On many roads the movement of

freight is more dependent on the capacity of the yards than on the amount of the equipment. "Car famines," of which so much is heard, are frequently the result of inability to make up trains in the yards and forward them, thus causing blockades and a deficiency in the car supply. It is not often that they result through business being so pressing that cars are in full and profitable use, and worked to their utmost capacity. A railroad having yards of ample size and well arranged, making it easy for cars to be quickly classified and forwarded to destination, or to the end of each of its divisions, is able to make up for many other deficiencies in handling freight. In particular, it is able to vastly economize the use of equipment.

Yard designing has not yet formulated any definite rules of invariable practical application. It has often happened that a yard considered as theoret ically correct has been a lamentable failure when built. The famous Edgehill yards of the London & Northwestern, near Liverpool, are an excellent type of admirably designed yards working well practically. These are about the best known of recently built railroad yards; and while to the railroad officer the point of chief interest in them may be the extent to which the gravity system of switching cars is used with success, the non-technical observer will probably be chiefly impressed by their size. Since they were put in operation some years ago, there has been an immense impetus to yard designing in the United States, and some of considerable size have been built. The indications are, however, that the railroads here are only entering upon the development of a great problem. The rapid and enormous increase in railroad tonnage in the last few years has brought out most clearly the need of providing every facility for promptly moving tonnage. Additional equipment requires larger and better arranged yards. The larger trains now hauled by the heavier motive power used also demand a re-arrangement of yards, and so from many sides the railroad officers are being pressed to devote their energies to this question as never before.

The railroads must hold their traffic by reducing the time of its transit. This does not necessarily mean increasing the speed of the trains. Indeed, a good deal of the tonnage and passenger travel is carried at needlessly accelerated speeds. But much time can be saved in the movement of freight business, especially by avoiding delays in transit. In the progress of railroading, almost an infinite number of means have been developed to this end which it would be useless to specify. The heavier motive power now used, with the larger coal and water capacity of their tenders, has permitted delays which were considerable to be much minimized. But with the use of all such means the savings they effect seem outweighed by those possible of attainment through the re-arrangement and enlargement of yards and terminals. Usually this involves costly work, but not in all cases. The reconstruction of the Grand Central Station in New York is an illustration of how costly the re-arrangement of terminals may be. That of the Pennsylvania at Jersey City, of the Reading at Philadel phia, and the very recent instance of the construction of the Southern Union Station at Boston, all exemplify how heavy a burden has been put upon the railroads in late years to provide larger terminal facilities. A different illustration is afforded by the experience of a road near New York, which found its train service inadequate to the demands of the business, yet was limited by its existing terminals to the number of trains it was then running. Careful study of these tracks, however, showed that they could be re-arranged without great expenditure, and without enlarging the ground they covered, so that their apparent limited capacity could be more than doubled. Such instances illustrate the intimate relation between yard capacity and the development of traffic. It is bringing railroad officers to see the necessity of concentrating a good deal of attention upon the problem of adjusting the capacity of divisional classification and distributing yards, as well as those at terminals, to the needs of the expanding railroad traffic. Some of the most interesting improvements now being carried out are along these lines.

THE EFFICIENCY OF BALLASTING.

The cost of ballasting absorbs a large share of the heavy improvement expenditures made by the railroads annually. It is an item in railroad maintenance the importance of which is generally recognized, and is assuming a greater share in railroad work each year. The amount of new ballast put in the track is a conspicuous part of the record of betterments made by every leading road. Besides the expenditure for new ballast, there is a continual necessity for renewing old material. Through the extension of new work and these renewals, the expenditure on account of ballast is likely to grow from year to year.

There is, however, another element working in the same direction; we refer to the tendency more evident on the best roads to use a superior quality of ballast where the traffic is at all heavy. A few years ago a road well ballasted with gravel was considered in remarkably good condition, other things being equal. Now, broken stone ballast is laid in the main tracks of most of the leading Eastern roads, or at least on their busiest sections. What this means in the way of added first cost may be in part appreciated by the fact that a good gravel ballast is estimated at $1,000 to $1,500 per mile, including surfacing, etc. Broken stone ballast is estimated at from $2,500 to $3,000 per mile. These figures are only approximate and will vary greatly in different sections of the country; but they sufficiently illustrate the relative cost of the two qualities.

How considerable a part of the year's expenses the cost of ballasting is may generally be ascertained by a brief examination of the annual reports of most companies. It is hardly practicable to illustrate by mentioning specific instances, because the methods of accounting on different roads vary so much. Some idea, however, of the extent to which ballasting is still carried on by the best maintained roads, which might be supposed to be limited largely to renewals, may be illustrated by the work planned for this year by the New York Central. That company, according to a recent statement, will use over 1,000,000 cubic yards of new ballast in its tracks this year. This may be assumed to be approximately equal to 330 miles, although the thickness of the ballast naturally regulates the number of miles a given quantity will cover. The Pennsylvania, it may be said, has a far greater amount of stone ballast in its track than any other road, but it is adding largely to the quantity each year. It has recently undertaken to lay with

broken stone ballast the ninety miles of road between Camden and Atlantic City, and a considerable portion of it is already done. This action is of more than usual interest, because last year a considerable expenditure was made on this division in coating the roadway with oil to diminish the dust from the gravel ballast. This, it appears, was not sufficiently satisfactory in its results to induce the company to longer postpone the more costly expenditure involved in stone ballasting.

The growing use of the costly broken stone as ballast, where a company's finances permit the expenditure, is in considerable measure due to the constant need of strengthening the track. The heavy motive power and large capacity cars running heavily loaded at high speed impose a tremendous strain on the roadbeds. Many companies have found their tracks so badly damaged after a short use of new heavy equipment that it has had to be withdrawn from service until the track could be materially strengthened. Even on the roads where the track expenditures have been most lavish in order to gain a substantial bed, the strength of the roadway has not been very much greater than has been requisite to withstand the demands upon it by the heavy loads moving over it. As a matter of fact, it is the question of the stability of the track which now largely limits the loads that the railroads must carry. Some time ago the strength of the bridges determined this point on a number of roads. Railroad bridge work, however, has been so generally rebuilt that it has been possible to put in new structures planned for greatly increased loads over those now carried. Mechanical engineers profess their ability to build motive power of far greater capacity than so far designed, if the track can be brought into condition to withstand the added weights of the engines. It is claimed that rails of the weights now rolled are sufficiently heavy, although their life is limited. This leaves the strength afforded by the ballasting to be considered. It is claimed by some that the further development of heavy equipment is limited by the strength which it is possible to give a railroad track through ballasting. This is something of a radical theory, but that it should be formulated indicates the importance of good ballasting.

Without entering upon the broad question thus raised, it may be admitted that the ballast to a considerable degree fixes the stability of the track. Further, broken stone ballast, all things considered, seems the strongest support for the roadbed now used by the railroads. This much being granted, its rapidly extending use is easily understood. In defining the requirements of railroad ballast recently, a well-informed committee of a railroad engineering association laid stress first upon the fact that it furnished a solid and uniform bearing for the crossties; then, that it distributed the load over a large surface of the roadbed, and, third, held the crossties in position. There appears pretty general agreement on broken stone as the ballast which best satisfies these leading requirements, and its use is recommended where its cost, as already intimated, is not prohibitive.

Not all roads, however, are so situated that they have to prepare for the movement of the heaviest rolling stock. They have a wide range of choice among material, some of which is of comparatively recent introduction for general use. Furnace slag is highly recommended for roads adjacent to iron furnaces, and many Western roads are using burnt clay ballast, among other material, with seeming satisfaction. There are few railroads in this country having any length of main line which are not required to ballast their chief divisions. It is a comparatively short time since a well ballasted track was a rare distinction confined to a few roads in the Eastern States. The increasing volume of business and the heavier trains have forced this improvement, and will require it to be carried much further in the next few years. As stated above, the problem has apparently been reduced to the alternative of either providing additional means of making the track more solid or preventing the further development of motive power. Some engineers have been inclined to take the ground that the point to which it is possible to bring the stability of track has been about reached, and that the determining element is in the ballast. Perhaps the majority of maintenance-of-way officers would not agree with this theory, but at any rate the efficiency of ballast as contributing to a solid roadbed is sufficiently indicated by the raising of such a question.

RAILWAY SAFETY APPLIANCES.

The equipment of railway cars with automatic couplers and train brakes, as required by the Safety Appliances Act of 1893, progressed for a long time with such discouraging slowness as to give good ground for original misgivings that the law could never be carried into complete effect. That the majority of the railroads seven years after its passage have not yet complied completely with its provisions might be considered prima facie evidence of the non-success of the law; except that the force of statistical figures has quite thoroughly demolished such superficial reasoning in the matter. The number of railway employes killed and injured during the year ended June 30th 1898 was smaller than the number killed and injured during the twelve months ended June 30th 1893. In the coupling and uncoupling of cars 154 less persons were killed and 4,289 less injured in the later than in the earlier year. Notwithstanding this large reduction, 279 persons were killed and 6,988 were injured during the year ended June 30 1898 in the coupling and uncoupling of cars. Such results show that an incompletely executed law may be at least better than no law at all.

The British Parliament is now legislatively seeking in this Safety Appliances Act a pattern for a similar measure, which will probably soon become the law of Great Britain. In that country the ratio of lives lost to the number of men employed in coupling and uncoupling cars has been as great as that formerly existing in this country, where the ratio has now been so materially cut down, as indicated by the figures already quoted.

The Safety Appliances Act was approved March 2nd 1893, but was not to become effective until January 1st 1898, discretion as to the time limit being vested in the Inter-State Commerce Commission. The first section prohibited carriers from hauling trains in inter-State traffic which were not controlled by train brakes. The second section similarly forbade hauling or permitting to be hauled cars not equipped with automatic couplers.

When the law was passed, the country was on the very verge of financial panic, and during the four following years the gross revenues of railways fell off 100 million dollars. The period was one of great financial distress, and while many of the roads did their best to equip their cars with the safety appliances, yet so general promised to be the failure to completely comply with the Act that the Inter-State Commerce Commission finally postponed the time limit until January 1st 1900. The roads equipped, as well as those not equipped, demanded this extension of time; for the company which hauled an unequipped car belonging on another road was held by the terms of the law to as strict account as the company owning the car. Had the law at that time been strictly enforced, according to the estimate of the Inter-State Commerce Commission, the withdrawal of freight cars from service would have amounted to forty per cent. This would have seriously affected all the roads, as from forty to sixty-five per cent of the car mileage in inter-State traffic is by foreign cars which come to the various roads in exchange of business.

It is indeed curious that at the expiration of this increased time limit 182 railroads were again compelled to petition for a further extension of time, and on precisely the reverse ground of the reason pleaded with equal justice two years before. Poverty was a previous excuse, whereas prosperity was the new plea for delay. While two years before the railroads had just begun to emerge from a long period of bad business which had crippled their attention to improvements, they were now provided with more traffic than could be taken care of. With all their cars in demand and more needed, to draw off a considerable portion of their rolling stock at once for a change of couplers would have proved a costly inconvenience, not only to them but to the business interests of the country generally. Many cars also had been drafted into service only to meet temporary emergencies, and when normal conditions again prevail will be laid aside. Also, the factories where couplers are made have had their capacity taxed to the utmost in the carrying out of orders for the manufacture of an enormous number of new cars equipped with the automatic couplers.

The Commission was forced by such conditions to again exercise its discretionary authority, and so extended the time seven months further, until August 1st 1900—two months beyond the time considered absolutely necessary. Already fifty-one roads had, according to the Commission's announcement, equipped 95 per cent of their cars with the coupling and braking devices, while, if the same rate of equipping were maintained on other roads during the next six months which was maintained during the previous six months, the terms of the law would be almost generally complied with before the expiration of the new time limit.

The special report of the Commission stated that a few roads, owing to special causes, had been prevented from making satisfactory progress during the whole of the preceding six months, but these roads would, at the rate of equipping then going on, be able to have their equipment completed within six months from December 1 1899. Of these the Denver & Rio Grande was instanced as an example. That company had, at the time of the report, only one-half its standard-gauge cars equipped, but its President stated that the remainder could be equipped within six months. Numerous small roads owning a very small number of cars had made, and probably would make, no substantial progress toward equipment of their rolling stock. These roads were situated almost wholly within States, and they hauled inter-State traffic, if at all, in the cars of other companies. In addition, it was stated that three or four important systems, within the six months from December 1, would not be able to have their equipment completed by ordinary exertion. The unequipped cars belonging to those systems would, however, in the opinion of the Commission, be so insignificant as compared with the total number of cars in service as to cause no inconvenience to the shipping public by their withdrawal.

The Commission did not think great difficulty would be met with in obtaining the material for the completion of equipment, for no particular make of coupler is insisted on, and many different standards are used. For instance, the Chicago Milwaukee & St. Paul road has upon its cars couplers of 17 different types, the number of couplers in the four most used types being 6,000, 1,000, 12,000 and 11,000 respectively. The Illinois Central has 33 different types, the number in the six most used types being 8,058, 3,121, 11,247, 2,150 and 1,413 respectively. It was also stated that "in view of the fact that the total demand for couplers for old cars will be less, since many roads have completed their equipment, and in view of the further fact that it must be presumed that various companies have long since placed their orders for the necessary appliances, we think there can be no difficulty in procuring within the next six months the necessary number of couplers of some standard and approved makes."

The railroads are undoubtedly anxious to completely install these safety devices at the earliest possible time. From the joint convention of the Master Car Builders' Association and of the American Railroad Master Mechanics' Association, which will meet in Saratoga in June, such recommendatory action is expected as may result in absolutely insuring complete equipment with safety appliances before August 1st. This could be done by an agreement between the lines that such of their unequipped cars as just previous to the expiration of the time limit may be abroad shall be equipped by the roads on which they are being run, expense being charged to the roads owning them.

The necessities of railroad development, as well as obedience to the law, will no doubt lead to such substitution of equipment without any further delay that can be avoided. A non-uniform system of coupling devices consisting of old and new types is admittedly more dangerous than link and pin couplers used alone. It frequently allows of telescoping of cars, as it provides little or no resistance to buffing. While the cost of these new safety appliances is greater than the cost of the old devices, yet the expense of repairs is considerably less, and there is also, of course, a big item saved in damage suits. Owing to the avoidance in the automatic coupler of the undue play or slack in the link and pin coupler, this substitution of old for new devices also enhances the economical and successful operation of the brakes. In the train brakes, as well as in the automatic couplers, not only is the danger element greatly minimized, but the requirements of a progressive and convenient service are also met.

ECONOMICAL SPEED EFFICIENCY.

Determination of the most economical, or rather the best paying, degrees of speed at which different classes of trains shall be run, is a feature of railroading which appears to increase in difficulty as it gains steadily in importance. No factor in connection with development of net earning capacity now merits or receives more serious consideratiou from railroad officials.

The tendency towards higher speed in train service has reached a stage where the folly of it, from the railroad standpoint, is clearly perceived. The impossibility, however, even if competition were removed, of diminishing the fast speed facilities of a service to which the public has now become educated, is also recognized. As regards the passenger service especially, the demand for fast travel appears not to abate, but to gain headway from every effort the railroad companies make to gratify it. Any fixed limitations in the higher speed tendencies of at least a few special passenger trains seems therefore a long way off in the future.

The great transportation difficulty hence arises of making safe and economical provision for such specially fast passenger trains without correspondingly increasing the speed of the entire passenger service and of the freight service as well. If a slow train is in front of a fast train on the same track, the fast train catches up with it, or in railroad parlance "runs over it," so that the slow train must be sidetracked. This involves loss of coal power and probably some extra expense in subsequently accelerating speed to make up time. If the fast train is in front of the slow train then there is an ever widening gap of track to which the slow train has practically an exclusive use.

With reference to freight train service, there is no doubt that a further continuance of the tendency towards higher speed must seriourly impair the economical performance of motive power. As it cannot be expected that such increased cost would be offset by extra compensation from the shippers for the extra speed (except, perhaps, in the case of perishable freight), a continued higher speed tendency only means unjustifiable waste. If, on the other hand, by agreement between managers, there could be moderate reductions in average speed, then heavier loads could be hauled with the same motive power as before, and rates might be so cheapened thereby as to more than make good to shippers any loss arising from the slower service.

The steady gain in the rate of speed of freight trains during the last fifteen years, up to a certain point, undoubtedly assisted in considerably reducing operating expenses. Certain special economies of course followed from the decreased time of train service. For instance, there was prevention of loss in wages, in interest on equipment, and in the energy of heat radiated from boilers. Beyond a definite limit, however—and motive power officials generally believe that limit now well reached—such economies fail to compensate for the added expenses for fuel and for wear and tear on the entire equipment of railroads. The same amount of work done in lesser time necessarily must require a greater fuel consumption. In many instances engines of twice the power must now handle the same freight train loads as fifteen years ago.

The shipper finds the element of time important chiefly in determination of the interest he must deduct from the money value of his shipment. If his goods can be delivered the same day there need be no deduction for interest. In general, however, days not hours comprise the units of his time reckonings. The average railway passenger, however, figures the value of his time with reference to the speed of the train, not in day but in hour units, and in the case of suburban service, not in hour but in minute units.

The rushing tendency of modern business life puts a constantly increasing premium on the value of time. When a traveler saves time once through a specially fast train, he seeks to save more time in the same way again. This originates a clear and positive public demand which the railroads as common carriers and as caterers to public convenience cannot ignore. Conservative financial policy, however, tends to restrain over-hastiness in discounting development of such demand. Indeed it is felt, the demand should be met only so fast as its earnestness is unmistakably evidenced in a public readiness to make good the increased bill for costs. As a matter of fact, higher speed for passenger trains is dependent far more on the disposition of the personal beneficiaries of such higher speed to pay for it than upon mechanical or engineering considerations.

A locomotive with a light load can be geared to run at almost any reasonable speed. But heavier loads demand increased boiler power, and require with increased speed a more rapid increase in the heat units of energy. No special formulas for axles, crank pins, side rods, piston rods, boilers, etc., contain factors relating to speed. Nor is different material required for freight than for passenger locomotives.

The expense, however, of passenger locomotives is nearly always greater than that of freight locomotives. This is for the simple reason that more is expected of them on account of the greater speed at which they are to run, which, translated, means greater power. Moreover, the higher speed produces greater strains, hence the number of locomotive failures becomes more frequent. Also the running of such fast trains must to some extent injure the capacity to handle other trains. Unavoidable delays occur in keeping the road clear. Accident risks increase, partly from the greater liability of breakage to machinery and roadbed damage, partly from the greater danger of actual collisions. Higher speed must mean less safety, unless extra precautions are taken, which involve heavy outlay of funds ; unless, in fact, the whole road service becomes keyed to a higher and more expensive pitch.

Such problems of train speed seem gradually destined to work out their satisfactory solutions. All general railroad improvements are really steps towards such solutions. Railroad men seem ready enough now to recognize that higher speed for certain classes of trains has become a permanent and not a transitory tendency. Railroad policy appears now to be directed towards fixing common and definite standards of uniformity, and of separation in the present multi-varying grades of speed. Such policy may ultimately aim at separate tracks for trains of different rates of speed. It is well understood that resulting economies could go far towards offsetting the great expense occasioned. Delays and accidents would become minimized. The faster trains would make long runs without stops, while the slower trains would suffer no troublesome

detentions because of the necessity of keeping the track clear. Trains generally would cease to require special expenditures on added fuel for acceleration of their motion.

The extra requirements of capital for satisfactorily meeting the problems of economical speed efficiency, are mainly comprised in the cost of general improvements. Most of these, the needs of ordinary fast service, or even of the slow but heavy freight service, of the present day, legitimately warrant, or even demand. They include more solid construction of bridge floors, heavier rails, more efficient braking power for rolling stock, block signals, interlocking apparatus and fences, closer inspection of lines, and in the cities elevation of tracks.

The most interesting feature of present day railroad development is the steady accomplishment of these improvements. As they progress and become paid for from the revenues of contemporaneous business, there should result a steadily diminution in the rate of increasing cost for faster service.

A NEW FORM OF CAR TRUST.

Mr. Edward S. Avery, of 67 Wall Street, has devised a form of car trust which he thinks possesses advantages over the ordinary form of such trusts. Its object is to apply towards the purchase of new cars the yearly contributions now made in reduction of car trust indebtedness. The following is an extract from a letter which Mr. Avery has addressed to the Knickerbocker Trust Company, in which the plan is outlined at length.

Car trust agreements are used only as a last resort, because they require the payment of one-tenth or one-sixth of the unpaid cost of the cars annually and draw high interest rates. Most railway managers would prefer to obtain the capital necessary for equipment by issuing first mortgage bonds running for a period of many years, requiring no annual payment on account of the principal and drawing a low rate of interest. Repairs and renewals are supposed to maintain the integrity of the equipment as security.

We have endeavored to prepare a new form of car trust certificate affording railway companies advantages similar to those of a first mortgage bond. We would propose an issue of car trust certificates or bonds in an amount equal to eighty or ninety per cent of the cost of cars given as security, running for twenty or thirty years, requiring no annual payment on account of the principal, and drawing interest at the same rate as is obtainable on the railway company's first mortgage bonds. Thus, if four per cent first mortgage bonds could be negotiated, let the car trust certificates draw four per cent interest. They would be offered for sale at a price which would net the investor a little higher rate of interest than would be obtainable on the first mortgage bonds at the market price.

Are cars good security for a loan of thirty years? The integrity of such security could be maintained by monthly or semi-annual payments into a sinking fund, which would be expended at the end of say every third year in the purchase of new cars. This simply provides specifically for maintaining the equipment, which every well-regulated railway company should do independently of any car trust. A covenant to add new cars every third year might not require cash payments into a sinking fund. Bonds or stocks of equal market value instead of cash could be deposited with the trustee, monthly or semi-annually, and withdrawn at the end of the third year when the new cars were assigned to the trustee, or in the case of the stronger companies financially, a simple covenant to add a certain number of new cars periodically might be sufficient.

The following table shows how cars would depreciate in value but the integrity of the security be maintained. It begins with cars costing $100,000. They are supposed to depreciate at the rate of one-tenth yearly. New cars are purchased and added to the security at the end of every third year out of the sinking fund, which accumulates at the rate of ten per cent of the cost of the original cars each year during the first three years. 13⅓ per cent per annum during the next three years and 16⅔ per cent per annum thereafter. The salvage or scrap value of the original cars (20 per cent of $100,000, or $20,000,) could be applied in part payment of the sum required for the sinking fund in the twelfth year. Every third year thereafter about ten thousand dollars for salvage could be applied in the same way. Deduct also the interest on the sinking fund. Thus we have an average yearly net requirement of, roughly, $12,000 for the sinking fund, to which should be added $3,600 per year for interest at the rate of 4 per cent on the $90 000 of certificates, making a total requirement of $15,600 per year. The purchase of new cars every third year keeps the equipment up to date, and results in an increase in the number of cars. There would be about twice the original number of cars in service after the ninth year. The value of the security is fully maintained during the first nine years, then it gradually increases until the eighteenth year, after which it remains at $110,000. At the end of thirty years the security, including the salvage value of old cars remaining on hand, would be worth $40,000 more than the debt of $90,000.

x New cars purchased out of sinking fund.

The size of the sinking fund in a specific case would depend upon the kind of cars, the work for which they were intended, etc.

Six ordinary car trusts of ten years each would be required to accomplish results which could be obtained by the use of one thirty year car trust. If our certificates drew four per cent interest as compared with five per cent for the ten-year car trust certificates we would effect a saving of about $1,500 per year in interest. The time and expense required in creating five ten-year car trusts would be avoided.

If steel cars, having a life of twenty years, were used, the annual payment into the sinking fund would be about one-half that shown in the table.

HISTORY.—Receivers were appointed in February, 1896, but on July 1, 1899, the road proper was returned to the company, the reorganization plan (in V. 66, p. 1235,) having been consummated without foreclosure and the road and equipment vastly improved in physical condition. All direct obligations, except those shown in the table, were either declared due and payable per order of Court and discharged, or exchanged for new securities (see V. 69, p. 25, 30, and V. 68, p. 1022. The reorganization of the B. & O. Southwest. was effected and new securities issued in Sept., 1899, per plan in V. 67, p. 688, the consol. mortgage of 1893 having been foreclosed. In January, 1900, new securities were issued under the plan of reorganization of the Cent. Ohio and other leased lines. V. 67, p. 688, 1109, 1206, 1356. In Dec., 1899, acquired substantially all the stock of the Monongahela River RR., Fairmont to Clarksburg, W. Va., 31 miles. V. 69, p. 1345.

x Amount unexchanged in Apr., 1900.—V. 69, p. 905.

NEW PARTIES INTERESTED.—In 1898, James J. Hill, President of the Great Northern Ry., and others, acquired a heavy interest in the property. See directors below. V. 67, p. 577, 632. In Dec., 1899, Pennsylvania interests acquired a large block of the stock, and in Jan., 1900, S. M. Prevost entered the directory as the official representative of the latter system.—V. 70, p. 229.

STOCK.—Authorized issues: Common, $45,000,000; pref, 4 p. c. noncumulative, $60,000,000; outstanding, see table above and "General Finances."

Of which in partial exchange for old bonds	10,569,000
To be sold to a syndicate for cash requirements	4,000,000

LEASED LINE BONDS.—The Baltimore Belt bonds deposited were called by the company under the option reserved per agreement in V. 66, p. 1235, and purchased at par and interest on Sept. 1, 1899.—V. 69, p. 25, 277, 333.

The Schuylkill River East Side bonds, stamped per agreement, V. 68, p. 40, are treated as follows: The road is leased at a rental equivalent to interest at 5 per cent on the existing bonds, but the new company has the right to purchase all the Schuylkill bonds at 110 and accrued interest at any time after Dec. 1, 1900, and prior to Dec. 1, 1903, on 30 days' notice. If not so purchased, the company will assume the ultimate payment of the principal when due. V. 69, p. 1063.

The Staten Island Rapid Transit property was sold under foreclosure in April, 1899, subject to the $1,000,000 first 6s, part of which were purchased for the B. & O. Under the agreement of Jan, 1899 (V. 68, p. 189), the $2,500,000 second mortgage 5s were exchanged for a like amount of new 4s issued by the reorganized Staten Island Co. These new 4s the B. & O. RR. agrees to purchase at par and interest in cash within 5 years, and meantime to guarantee interest thereon at 4 per cent. V. 68, p. 189, 333, 525; V. 69, p. 696.

The West Virginia & Pittsburg (see agreement in V. 67, p. 1310), has been operated since Sept. 1, 1899, under a 99 years' lease, for 4 per cent on the mortgage, to be appropriated to payment of bond interest, the B. & O. having the option for 5 years to purchase the bonds at par and accrued interest on 60 days' notice. V. 69, p. 439.

The B. & O. in March, 1900, agreed to purchase on or before Feb. 1, 1903, at 125 per cent and interest the $2,400,000 Pittsburg Cleveland & Toledo bonds (or not less than 70 per cent thereof), with the option by the bondholders to exchange for new securities under any reorganization plan approved by the B. & O. prior to that date. V. 70, p. 632.

DIVIDENDS.—First semi-annual dividend on preferred, 2 per cent, was paid on April 2, 1900. V. 70, p. 329.

GENERAL FINANCES.—The large decrease in net earnings for the year 1898-9, it is explained, is caused by the fact that the receivers in settling their accounts have charged against the revenue of the year large sums ordinarily extending over a much longer period, and also by the large amounts put into the property and charged to operating expenses. See official statement, V. 68, p. 1224. As to physical rehabilitation under the receivership, see official statement, V. 69, p. 128.

In addition to the $49,975,000 first mortgage g., 4s issued in June, 1899, for reorganization purposes, $1,500,000 additional of said bonds, being part of the $7,000,000 reserved for corporate purposes, were used for the purpose of providing funds for the purchase of equipment and for other improvements to the mortgaged premises. In Feb., 1900, $8,600,000 additional first 4s and $2,500,000 B. & O. Southwestern 3½s were sold to purchase most of the $10,000,000 Pitts. & Western first mortgage bonds and for improvements, $2,052,000 of the $3,500,000 P. & W. second mortgage bonds having been acquired in July, 1899, thus ensuring the reorganization of the P. & W. in the interest of the B. & O. V. 69, p. 132; V. 70, p. 229, 278, 738.

Holders of common stock may subscribe on or before May 7, 1900, to the remaining $6,398,900 of the $45,000,000 authorized common stock at $80 per share, of which $10 payable on making of subscription and $70 on Oct 1, 1900, the new stock not to be entitled to any dividends for the year ending June 30, 1900. V. 70, p. 685, 738.

POSITION OF NEW COMPANY, INCLUDING CENTRAL OHIO SYSTEM, BALTIMORE & OHIO SOUTHWESTERN, ETC. (See V. 69, p. 31.)

Estimated net income on basis of year end. June 30, 1898, (including $1,989,261 from B. & O. S. W)	$10,285,694

$15,000,000 Pittsburg Junc. & Middle Divis. 3½ per cents.	525,000
$40,000,000 Southwestern Div. 1st 3½ per cents	1,400,000
$50,000,000 first mortgage 4 per cents	2,000,000
Estimated rentals, including Belt Line	500,000
Taxes (if foreclosure is necessary the taxes may increase).	544,794
Taxes B. & O. Southwestern system	293,998
Terminals	202,000
Ground rents and mortgage interest	75,000
Total charges of new company	$7,990,792
Bal. sur., [equals 3⁴⁄₅ p. c. on $60,000,000 pref. stock]	$2,294,902

"The fixed charges will thus be well within the past net income of the property—even that of the last fiscal year of extreme depression. The new company will be relieved from floating debt and the embarrasment of car and wheelage trust payments, and will start with substantial working capital." The following is also given:

Apart from the large amount provided in the plan dated June 22, 1898, to be expended on the B. & O. RR. properties, the plan for the reorganization of the Central Ohio RR. system provides $3,000,000 to be expended on the properties comprised therein and for additional equipment; and the B. & O. Southwestern plan provides $5,500,000 to be expended in like manner on the Baltimore & Ohio Southwestern System. The above statement of earnings does not allow for any increase in earnings from these expenditures, which, it is confidently expected, should largely increase the surplus over fixed charges.

ORGANIZATION, CONTRACTS, ETC.—The Company was chartered in Canada February 28, 1868, and debt readjusted in 1878. In Nov., 1882, a close contract was made with the Michigan Central for 21 years from January 1, 1883, providing for the payment to Canada Southern of one-third the joint income over all fixed charges. The contract provided for a re-apportionment every five years, and in December, 1892, it was agreed to give the Canada Southern 40 per cent and the Mich. Cent. 60 per cent of the first $1,000,000 of net earnings, any amount over that to be divided on the basis of one-third and two-thirds, as before. But under the original contract each company is still accorded all benefit from the reduction in its fixed charges; consequently as the Michigan Central to Jan. 1, 1898, had reduced its charges about $327,000, that amount is credited to it before division is made V. 64, p. 5.

HISTORY, &C.—The former Chesapeake & Ohio was sold in foreclosure April 2, 1878, and this company organized. In 1888, under the direction of Drexel, Morgan & Co., reorganized without foreclosure, and the road extended to Cincinnati. The consolidation with the Richmond & Alleghany was consummated in January, 1890. The Elizabethtown Lexington & Big Sandy and other roads were absorbed in 1892. In September, 1893, the Chesapeake & Ohio Steamship Co., controlled by this company, began operations. See below and V. 55, p. 1078.

See terms of exchange in V. 54, p. 642. Stock may be reduced by majority vote of stockholders whenever deemed desirable.—V. 70, p. 175.

DIVIDENDS.—First dividend, 1 p. c., paid Oct. 25, 1899. V. 69, p. 383.

BONDS.—The *series A bonds of* 1878 cover, subject to the *purchase money* 6s, the main line from Richmond, Va., via Charlottesville to Ashland, Ky., 428 miles, and are equally secured with the *Peninsular Extension* 6s by first mortgage on extension to Newport News, 75 miles.

The *consolidated mortgage* due in 1939 is for $30,000,000 (trustee, Central Trust Company), and sufficient bonds are reserved to provide for prior liens. This mortgage is also secured by deposit in trust of the $11,000,000 bonds and two-thirds of the stock of the Maysville & Big Sandy RR., [on road Ashland to Covington, Ky.], and of the Bridge to Cincinnati, all owned by Ches. & O. (Abstract, V. 49, p. 147.)

Richmond & Allegheny Division bonds cover the low-grade freight route from Richmond via Lynchburg to Clifton Forge and branches. (Mort. abstracts, V. 51, p. 144.)

The *general mortgage of* 1892 (Central Trust Co. and H. T. Wickham trustees) is for $70,000,000, but additional amounts at $25,000 per mile may be issued for double-tracking. Of the $70,000,000 as above, $32,691,000 bonds were reserved to provide for the $30,000,000 consols of 1889, issued or to be issued, etc. The balance unissued may be sold for new acquisitions, rolling stock, etc., but not more than $2,000,000 thereof in any one year. The mortgage covers the entire property of the company, real and personal, at the time the deed was made, and all additional property and mileage acquired with the proceeds of the bonds. See full abstract of mortgage in V. 54, p. 644; also V. 54, p. 642; V. 55, p. 335. In Jan., 1900, $26,057,000 had been listed on New York Stock Exchange.

The *Elizabeth't'n Lexington & Big Sandy* first mortgage bonds, interest on which has been reduced to 5 per cent, have been endorsed with the C. & O. guaranty of principal and interest, and general mortgage bonds have been set aside to retire them at maturity.

The 1st 4s on the Greenbrier Ry. are direct obligations of the C. & O. Of the $3,000,000 authorized, $1,500,000 were to be issued at once and the remaining $1,500,000 only for further construction or equipment, extensions, betterments, &c.—V. 69, p. 383.

The *Louisville & Jeffersonville Bridge* bonds, of which $3,000,000 are outstanding, are guaranteed jointly and severally by the Chesapeake & Ohio and Cleveland Cincinnati Chicago & St. Louis; any deficit on account of the bridge is payable by them in the proportion of one-third and two-thirds respectively—see V. 60, p. 130; V. 61, p. 327, 559; V. 62, p. 84 and separate statement for L. & J. Bridge Co.

OPERATIONS, FINANCES, &C.—Since the reorganization in 1888, when the control of the company was placed for five years in the hands of trustees, the property has been greatly enlarged and improved.

In Jan., 1900, Pennsylvania interests purchased a large block of stock, and with the Morgan-Vanderbilt interests now own a majority of the stock.—V. 70, p. 75, 632.

The interest charges for the fiscal year 1899-00 are estimated at $3,220,616, against $3,133,097 in 1898-99. V. 67, p. 322.

The steamship line was formally opened Sept. 7, 1893, and owns six new steamers, using the railroad wharves at Newport News.

The stockholders voted Oct. 24, 1899, to aid the Greenbrier Ry. to construct its road by the issue of not over $3,000,000 C. & O. 4 per cent gold bonds, payable Dec. 1, 1999, secured by mortgage on the Greenbrier Ry. See above.—V. 69, p. 383.

HISTORY.—Succeeded to the property in October, 1862; the St. Louis Jacksonville & Chicago RR. has been merged. (V. 69, p. 645.) In April, 1899, the road was purchased by the Harriman syndicate, as below In Apr., 1900, the new C. & A. *railway* leased the property for 99 years for its net earnings, the charter of the *railroad* not permitting the merger of recent acquisitions of the syndicate. V. 70, p. 686.

STOCK.—The preferred stock has prior right to a non-cumulative dividend not exceeding 7 per cent from net earnings and (after payment of 7 on common) also shares with common in any surplus.

LEASED LINES.—The *Kansas City St. Louis & Chicago* is leased in perpetuity from Nov. 1, 1877, at rental of 35 per cent of gross earnings. Its bonds are held by the U. S. Trust Co. as security for Alton bonds of 1878. These have a sinking fund (in 1896) of $135,690 per annum. Common stock, $271,800, of which $157,600 owned by C. & A.

The *Joliet & Chicago* is leased from January 1, 1864, for the term of its charter, and forms part of the main line. Rental, 7 per cent on stock.

The *Louisiana & Missouri River RR.* was leased in perpetuity, Aug. 1, 1870. Under the agreement of Nov. 13, 1894, the Alton assumed to pay, in lieu of rentals, all interest on the *first* and *second* mortgage bonds and their principal when due, also 7 p. c. per annum on the guaranteed preferred stock, and also to purchase the L. & M. R. unguaranteed preferred at $29 50 per share and the common at $10 per share. V. 59, p. 1057. Unguaranteed preferred stock is $1,010,000 and common $2,312,700, neither of which have ever paid dividends. In Dec., 1898, all but 247 shares of unguaranteed preferred and 445 shares of common stock had been purchased by Chicago & Alton.

GENERAL FINANCES.—In Apr., 1899, a syndicate composed of Geo. Gould, J. H. Schiff, E. H. Harriman and James Stillman had acquired over 95 per cent of the preferred and common stocks, paying therefor $200 and $175 per share respectively. V. 68, p. 230, 281, 379, 427, 523, 670. See official circular in V. 68, p. 281. The syndicate in May, 1899, also acquired control of the St. Louis Peoria & Northern, of which Springfield to Peoria, 63 miles, was taken over by the C. & A; balance by the Ill. Central. The syndicate also assumed the lease of the Chicago Terminal Transfer terminal facilities at Chicago under a modified rental. V. 69, p. 26, 1147; V. 68, p. 1022, 1225.

The mortgage securing $40,000,000 3 per cents, dated Oct. 1, 1899, will refund bonds marked "¶" in table maturing during next four years, and also provide fund for improvements and extensions. Bonds in excess of $40,000,000 may be issued thereunder on vote of three-quarters of stockholders for extensions of not over 500 miles, main track, at not exceeding $20,000 per mile, to fund leased line rental obligations and for future betterments not to exceed $5,000,000 at not over $1,000,000 per annum from Jan. 1, 1900. Stockholders subscribed in July, 1899, for the $40,000,000 new bonds at the rate of $650 cash for each $1,000 face value, the first $10,000,000 (25 per cent) being paid for Oct. 10, 1899, payment for an additional $22,000,000 has been called for payment on May 7, 1900, and the remaining $8,000,000 subscription was canceled. V. 70, p. 739. See official circular in V. 69, p. 178; also p. 26, 129, 541; V. 70, p. 429.

As to interest payment on syndicate's purchase-money certificates, see V. 70, p. 531.

ORGANIZATION, &C. This was a consolidation in July, 1875, of the Chicago Burlington & Quincy in Illinois and the Burlington & Missouri River in Iowa. In 1880 the Burlington & Missouri in Nebraska was absorbed. The leased lines are practically owned and there is no charge for rentals in the income account, except as interest on bonds. The Chicago Burlington & Northern and various other subsidiary lines situated in Illinois were absorbed in May, 1899. V. 68, p. 975. In Dec., 1889, acquired Chicago Ft. Madison & Des M. RR.—V. 70, p. 75.

In Dec., 1899, in addition to mileage above, Grant City to Albany, Mo., 20 miles, and an extension of a branch line from Arcadia to Sargent, Neb., 20 miles, were operated. A branch from Alliance, Neb., to Hartville, Wyoming, 141 miles, was under construction, of which Alliance to Camp Clark, in the Valley of the North Platte, about 35 miles, was completed in 1899. In March, 1900, extension from Toluca, Montana, to Cody City, in Big Horn Basin, Wyoming, reported to be proposed.

LANDS.—Only 48,372 acres remained unsold June 30, 1899; land notes outstanding, including interest payable, $154,630.

CAPITAL STOCK.—The stock has been increased for the acquisition of new lines, and in 1880 a distribution of 20 per cent was made. From Sept. 1, 1890, to Nov. 30, 1899, $12,158,800 stock was issued to retire an equal amount of convertible debentures, leaving still outstanding $3,119,900 convertible bonds. In April, 1899, $4,041,500 additional stock was subscribed at par. See "General Finances" below.

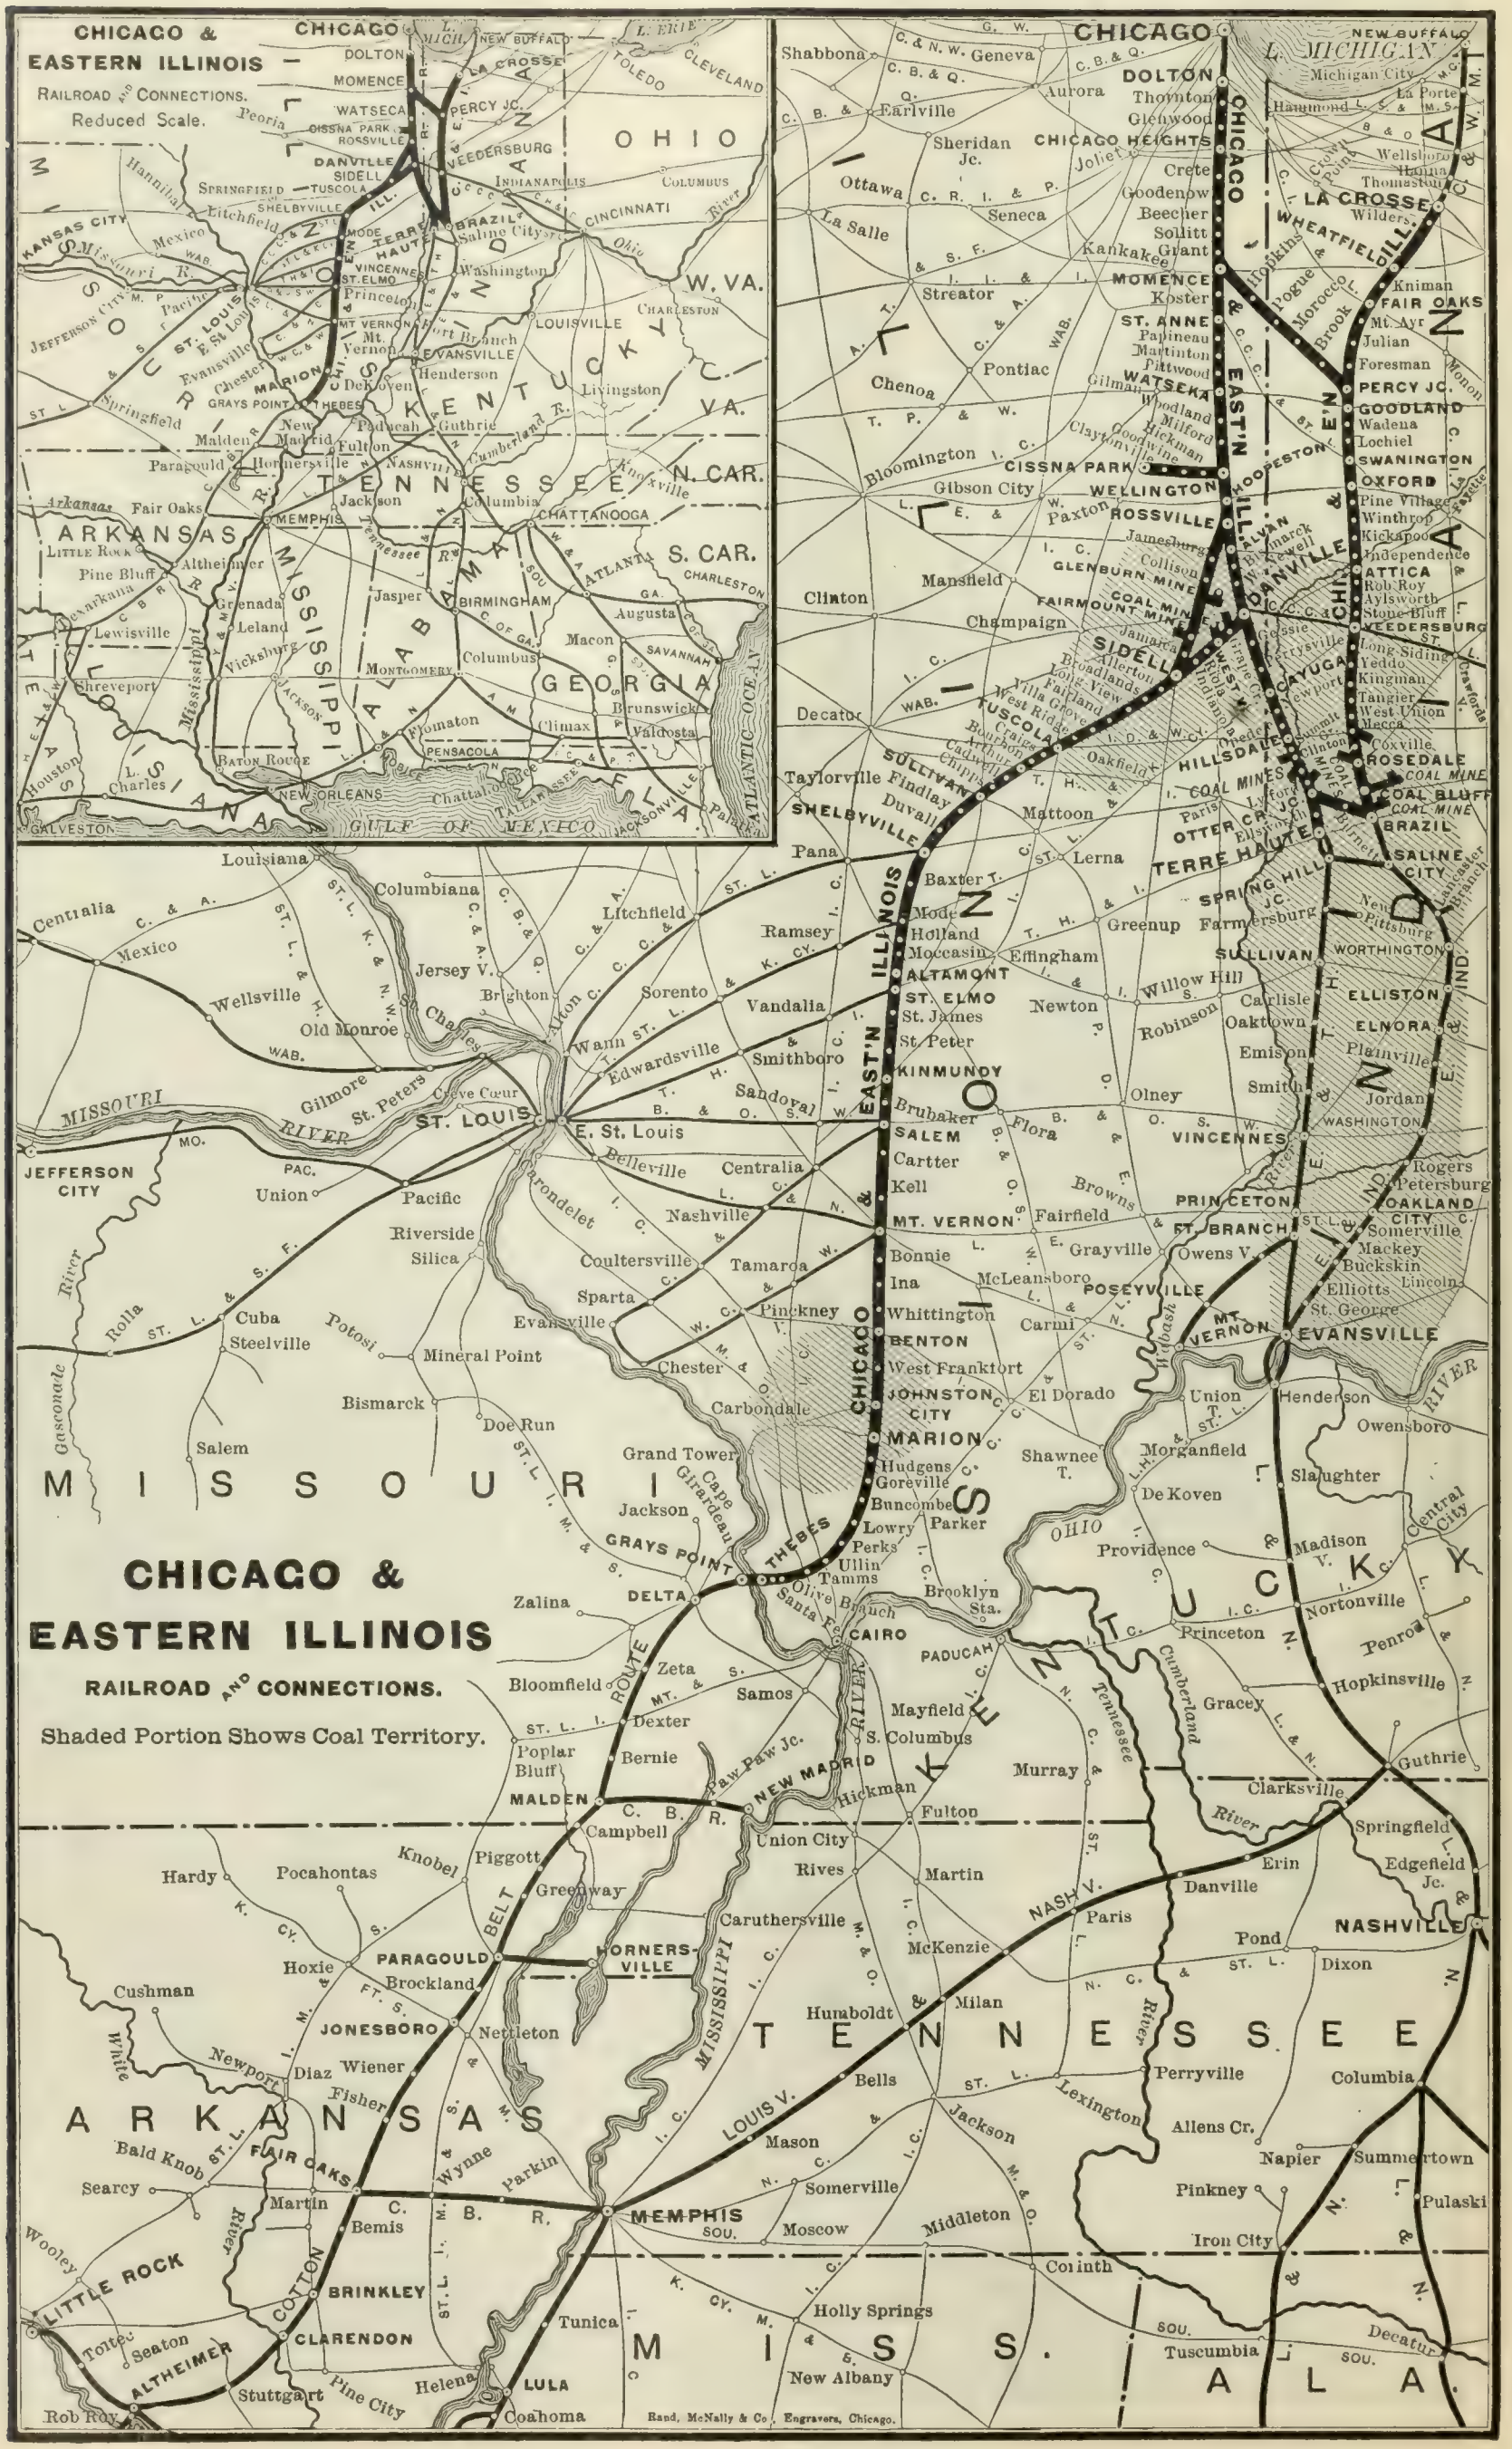
SINKING FUNDS.—Included in the bonds outstanding in the table above are sundry bonds of the company which are held alive and drawing interest for account of the various sinking funds.

BONDS.—For full description of each loan see the editorial article on pages 3 to 6 of SUPPLEMENT of Oct., 1896, and CHRONICLE V. 63, p. 775.



The *mortgage of 1899 for $85,000,000* secures bonds dated July 1, 1899, maturing July 1, 1949, and to bear interest at not to exceed 5 per cent. Such bonds as may be issued bearing 3½ per cent interest will be subject to call at 105 per cent and accrued interest and those bearing interest at less than 3 p. c. at par and interest on any coupon day after thirty years. The issue is limited to $85,000,000, and the lien securing the bonds will become an absolute first mortgage, covering all lines east of the Mississippi River (including the Chicago Burlington & Northern and other lines to be merged), upon the payment of $28,924,000 consolidated mortgage 7 per cent bonds due July 1, 1903, and of $2,320,000 Chicago & Iowa Division 5 per cent bonds due Feb. 1, 1905. Sufficient of the new loan is reserved to take up these $31,244,000 bonds and $21,594,000 were issued in 1899-1900, as below stated. The remainder of the loan will be available for additions, etc.—See V. 68, p. 771; *abstract*, V. 69, p. 283; V. 69, p. 795.

The *Iowa Division* bonds are a first mortgage on the main line in Iowa from Burlington to East Plattsmouth on the Mo. River, 278 miles, and on 122 miles of branches; they are also a first collateral lien on 420 miles of branches and 86 miles of second track. These bonds have a sinking fund of 1½ per cent ($203,800) yearly, for which the 4s are subject to call at 100, the 5s at 105. The single main line and branches covered "shall not exceed in the aggregate 900 miles," at $16,000 per mile; on second track (of which Jan. 1, 1897, there were 88 miles) may be issued an additional $14,000 per mile. (V. 65, p. 462.) Iowa Div. bonds, $56,000 fives and $170,000 fours, have been drawn for the sinking fund and will be paid April 1, 1900. V. 69, p. 1192.

The Chicago Burlington & Quincy sinking funds for the several loans respectively held alive June 30, 1899, of the bonds given above as outstanding: Of **g**, $4,714,800 July 1, 1899, and $134,000 additional drawn Jan. 1, 1900; **h**, $1,930,000; **k**, $307,000. Also canceled bonds not included above, **f**, $3,364,000, July, 1899.

Denver Ext. bonds can be increased only for 2nd track at $10,000 p. m. The collateral trust *Nebraska extension* bonds of 1887 (New England Trust Co., of Mass., trustee) are issued at $20,000 per mile for single and $10,000 per mile for second track on not exceeding 1,500 miles. **Abstract** of deed V. 45, p. 441.

Burlington & Missouri RR. in Nebraska consol. mortgage of 1878 is for $14,000,000, and is now a 1st M. or 1st collateral lien; all except the $5,000,000 of *exempt* bonds are subject to call for the sinking fund at par, $231,200 having been retired in 1896. The "exempt" bonds may be called after 1908.

The 5 *per cent debentures* of 1890-92 are *convertible* $ for $ into stock any time prior to Dec. 1, 1902, except when books are closed. $11,721,200 had been thus converted up to June 30, 1899. V. 67, p. 842. See terms of conversion on page 5 of the SUPPLEMENT for Oct., 1896.

Many of the bonds are redeemable (may be drawn) before maturity at various prices, plus accrued interest, as stated in the table above.

GENERAL FINANCES.—The Chicago Burlington & Quincy Railroad has been one of the most profitable in the country, as its numerous branches tributary to the main line were built into choice agricultural territory. Corn, however, being one of the principal articles carried by it, its earnings vary greatly according to the size of the crop.

In May, 1899, all of the bonds and most of the stock of the Keokuk & Western RR. (which see) was acquired. V. 69, p. 756.

In April, 1899, stockholders subscribed pro rata for $16,166,000 new 3½ per cent bonds at 75, and $4,041,500 stock at par, in blocks of $1,000 bonds and $250 stock, for which $1,000 paid, $500 on June 8 and $500 on Sept. 8. This issue of 3½ per cent bonds is limited to $85,000,000, as above stated, and is designed to retire eventually the bonded indebtedness of all the lines east of the Mississippi River. The lien will become an absolute first mortgage on payment of the consol. 7s and the Chicago & Iowa division 5s. The present issue is made to take up the bonds of Chicago Burlington & Northern RR. and $1,076,000 Ottawa Oswego & Fox River Valley bonds, amounting in all to $13,787,500, at a cost of $14,235,575. The balance is to be used for improvements. Interest on the new bonds began July 1, 1899. See circular V. 68, p. 771; V. 69, p. 751. The C. B. & N. was merged in May, 1899. In Feb., 1900, an additional $2,000,000 Illinois Div. bonds were sold and in April, 1900, $3,428,000 had been exchanged for consol. 7s of 1903.—V. 70, p. 739.

The company's sinking funds have received to June 30, 1899 over $19,250,000. With this money about $8,000,000 of the company's bonds have been canceled, while the remainder of the cash not so used has been invested for the benefit of the several sinking fund loans in bonds that are held alive drawing interest and are therefore included in the company's outstanding debt. In 1898-9 the aggregate sinking fund income was $1,143,318, of which $523,619 is the amount carried direct to the sinking fund and the balance appears in the accounts merely as part interest on funded debt.

Debentures aggregating $31,910,900 have been issued; of this amount $9,000,000 was used to purchase the Hannibal & St. Joseph, from which a good income is received, while $7,647,000 was used to buy other stocks and $15,263,900 (since mostly converted into stock) for improvements, etc.

As unencumbered assets, on the other hand, the company owns besides the $14,244,900 Hannibal & St. Joseph stock above mentioned, a large amount of stocks and bonds, a list of the same being in V. 63, on pages 778 and 877. The road unbonded and the roads whose bonds are all owned were in 1898 (V. 63, p. 775), as follows:

REORGANIZATION PLAN.—The plan issued in Nov., 1899 (V. 69, p. 954,) provides for the foreclosure of the first mortgage, due Jan., 1900, and the issue of the bonds shown in the table. The Grand Trunk will give a traffic agreement of 30 per cent of its gross earnings on interchanged traffic to meet the interest on the new 4s and receive the $6,000,000 new stock in re-payment of advances and full satisfaction of the floating debt. The old 1st 6s will receive an equal amount of new 1st 4s (see V. 69, p. 1061,) and the old 2d 5s 75 per cent in new 1st 4s. Of the new bonds, $4,500 000 will be issued for double tracking and other capital purposes and $563,000 will be reserved for Northw. Grand Trunk 6s. Majority of bonds deposited Jan., 1900.

Foreclosure suit was begun Jan., 1900. E. W. Meddaugh and H. E. Joy are receivers. A. Kayser & Co, 21 Cornhill, London, E. C. (Martin's Bank, Lim., depository,) and Simon Borg & Co., New York, represent opposition to plan.—V. 70, p. 39, 75.

The Leavenworth Terminal Ry. & Bridge is used into Leavenworth.

HISTORY.—The Chicago St. Paul & Kansas City was organized in May, 1886, and in December, 1887, merged with Minnesota & Northwestern. In August, 1892, reorganized per plan, Vol. 55, p. 856. Each $1,000 of Minn. & N. W. and Chi. St. P. & K. C. first mort. bonds was given $500 debenture stock and $600 pref. "A" stock.

On Sept. 7, 1893, the Great Western acquired by deed the title of the Chicago St. Paul & Kansas City Ry. (815·67 miles), subject to the mortgage bonds, of which it owns all except $1,000. It also acquired the title to the Leav. & St. Joseph Ry. (23 miles), which is unencumbered.

SECURITIES.—The holders of *debenture* and *preferred A* stock appoint the finance committee, which exercises general supervision of finances. Additional securities of said issues can be put out, but only with consent of a majority of both said classes of stock present at a meeting. Securities of other issues having a lien prior to preferred A can be created, but only with consent of two-thirds of both classes. The several classes in case of liquidation will have principal paid in gold, according to their priority right to dividends. At extraordinary general meetings of holders of debenture stock and preferred A stock collectively, holders of *one-tenth* of said stocks outstanding, present or represented, constitute a quorum and by a majority vote have power to sanction any modification of the rights of said stocks. The provisions of the several classes of stock and of the trust deed were fully set forth in the editorial article of the SUPPLEMENT for October, 1897.

In 1898 the authorized issue of 4 p. c. debenture stock was increased from $15,000,000 to $30,000,000 for future refunding and improvements. See General Finances below.—V. 66, p. 133, 663, 1088.

Cash interest resumed on all debenture stock and *all* the preferred "A" is entitled to cash dividends since July 1, 1899.—V. 67, p. 1206.

DIVIDENDS.—On pref. "A" paid Jan., 1899, 2 p.c.; in July, 1899 2 p. c.; in Jan., 1900, 2½ p. c. (V. 69, p. 1193.) Full dividends are expected to be paid in July on both the "A" and "B" stocks, and the earnings for the six months to show a surplus after meeting these requirements.—V. 70, p. 279.

FINANCES.—The deb. and pref. "A" stockholders voted Jan. 30, 1899, to issue $8,000,000 debenture stock, in order to refund in the near future the following securities: Ch. St. Paul & K. C. 5s, subject to call at 105, $2,823,150; equipment lease warrants, $1,673,000; sterling loan 6s, $1,454,000; gold notes 5s, $1,100,000, and for improvements. V. 68, 186. Of this new stock, $3,300,000 was sold in 1899 to retire the $2,823,150 priority loan (the only mortgage debt), called and paid Jan. 1, 1900, and on Jan. 24 the stockholders authorized the issue of $2,000,000 additional debenture stock for capital expenditures of 1900, additions and improvements, any surplus to be held available for similar expenditures in the future. V. 70, p. 279. By improvements of the permanent way, etc., operating expenses were reduced in 1898-9 to 67·21 per cent of earnings, against 70·13 per cent in 1897-8 and 77·47 in 1894-5.—V. 69, p. 501.

The main line of the Wis. Minn. & Pac., extending from Red Wing, Minn., to Mankato, 93·7 miles, purchased from the Chic. R. I. & Pac. by friends of the C. G. W. has been operated since June 1, 1899, in connection with the latter, but the earnings kept separate. V. 68, p. 976

History, &c.—The Milwaukee & St. Paul RR. Co. was organized May 5, 1863, and on Feb. 11, 1874, took its present name. The system has since been greatly extended by the construction and acquisition of other lines. The sale of the Milwaukee & Northern to the St. Paul was ratified in September, 1893. In 1899, all the stock and bonds of the Des Moines Nor. & West, 147 miles, were acquired, the C. M. & St. P. taking possession July 1, 1899.—V. 68, p. 40, 975. Late in 1899 extensions from Rockwell City to Storm Lake, Iowa, 39 miles, and Fonda, Iowa, to Spencer, 44 miles, were opened, and extension of Libertyville line to Fox Lake, Ill., 20 miles, was also almost completed. V. 69, p. 1103. In July, 1899, extension from St. Paul to Duluth was being considered. See V. 69, p. 179. The stockholders voted Sept. 23, 1899, to merge by consolidation the leased lines in Illinois, V. 69, p. 228, 694.

In March, 1900, the Janesville & Southeastern RR. was incorporated with $2,000,000 stock to build a road from Janesville 35 miles southeast to Bloomfield, in the interest. it was reported, of the C. M. & St. P. In March, 1900, extensions from Elgin, Ill., to Delavan Lake, Wis., 45 miles, and one from Bowdie, S. D., west to Missouri River, about 50 miles, was reported to be proposed.

Capital Stocks.—The preferred stock has a prior right over the common stock to a dividend of not over 7 per cent from net earnings in each year, but if not earned it has no cumulative right. After payment of 7 per cent on preferred and 7 on common, both classes share *pro rata*. Common stock authorized, $47,062,560. Preferred stock on Dec. 31, 1873, was $12,274,483; it has been increased to present figures almost entirely by exchange of convertible bonds for stock, only about $5,000,000 having been issued for other purposes (improvements, etc.) In July, 1899, $15,775,000 prior lien bonds outstanding were exchangeable for preferred.

Bonds.—Abstracts of some of the older mortgages were published in the Chronicle, V. 45, pp. 85, 114, 144, 212, and V. 48, p. 830.

The following bonds are *convertible into preferred stock* at any time within ten days after a dividend shall have been declared and become payable on the preferred: Iowa & Dakota Extension 7s, River Division 7s, Chicago & Milwaukee 7s of 1903, Hasting & Dakota 7s of 1903 and Ch. Mil. & St. P. consols of 1875. The consols of 1874 also are convertible into preferred within 15 days after dividend day. The convertible bonds were fully described in Supplement for Mar. '93, p. 2.

Chicago & Pacific Western Division 1st 5s were issued at $20,000 per mile for road, with additional amounts for equipment and bridges; no further bonds can be issued. The mortgage covers the following miles of road: Farley, Ia., to Kansas City, Mo., 341 miles; Marion, Ia., to Council Bluffs, Ia., 262 miles; Astor, Ia., to Aberdeen, North Dak., 352 miles; branches 162 miles; total, 1,117 miles.

Terminal five per cent bonds of 1884 cover terminal property of several hundred acres in Chicago and Milwaukee.

The *general mortgage* of 1889 (see **abstract** in V. 48, p. 830) is for $150,000,000, to the United States Trust Co., of New York, as trustee, and covers the entire railway property and franchises of the company (therein described) subject to prior liens as below mentioned. The prior lien bonds cannot be extended, but will be paid off at maturity.

On June 30, 1898, the following amounts of general mortgage bonds had been issued or were reserved for the purpose indicated, viz:—

Listed on New York Stock Exchange.....	$26,176,000
In treasury of the company (unsold).....	7,507,000
Total reported by the company as outstanding.....	$33,683,000
Reserved for prior liens.....	95,297,500
Originally reserved for prior liens, which have since been converted into pref. stock. Will eventually become available for improvements. (See also below).....	17,906,500
Available for improvements, etc. (see also below).....	3,113,000
Total authorized.....	$150,000,000

The $33,683,000 outstanding include $6,000,000 issued to pay for 178 miles of sundry small branches on which the general mortgage is a first lien, and to retire the $2,500,000 first mortgage bonds of Chicago Evanston & Lake Superior Ry., a Chicago suburban road, also $4,232,000 issued to replace prior bonds paid and canceled.

The $3,113,000 "available for improvements, etc.," of bonds above mentioned are applicable for premiums paid in retiring or refunding convertible and other prior lien bonds bearing a higher rate of interest than 4 p. c., for cost of branches, second and side tracks, real estate, bridges, rolling stock, equipment, etc. On July 1, 1899, of the prior lien bonds outstanding, $15,775,000 (maturing 1902-1908) were convertible into preferred stock; if from time to time so converted they will set free a like amount of general 4s which, with the $17,906,500 reserved against bonds already converted, will become available for improvements, additions, etc., as soon as the balance ($3,113,000) of the amount originally reserved for improvements has been so expended. V. 48, p. 830; V. 50, p. 205. N. Y. Stock Exchange to Oct., 1899, had listed $26,176,000 generals—see "General Finances," V. 65, p. 462, and V. 66, p. 335.

General Finances, &c.—Dividends on common stock were resumed in October, 1892. See "dividends" above.

The funded debt was increased during the year 1898-99 by the issue of $4,509,000 of general mortgage bonds and was decreased $4,871,000 by underlying bonds retired and canceled; of the latter $3,777,000 were converted into preferred stock and $897,000 into common stock. Of the funded debt there was in the treasury June 30, 1899, $8,596,000 (against $6,587,000 June 30, 1898), of which $7,183,000 was general mortgage 3½s and $324,000 gen. M. 4s.

Average freight train load in 1898-9 was 190 tons; rate per ton per mile, 0·937 cents; in 1897-8 train load, 178 tons; ton rate 0·972 cents.

Of the mileage shown above as of Jan. 1, 1900, 250 miles were opened on the C. & N. proper since the close of the fiscal year and 48 on the C. St. P. M. & Om., and additional lines were then under construction. The Sioux City & Pacific is to be improved and extended if complete ownership can be obtained.—V. 69, p 1147; V. 70, p. 739.

In Oct., 1899, the Boyer Valley Ry., 90 miles, and the Minnesota & Iowa Ry., 119 miles, were under construction, their bonds to be issued at the rate of $16,000 per mile to be guaranteed, principal and interest, by the C. & N., which will probably absorb the roads after completion. In Aug., 1899, the Boone County Ry., incorporated in the interest of the C. & N., had under construction 74 10 miles.—See V. 69, p. 290.

History, &c.—The Chicago & North Western Railway was organized in 1859, and has since absorbed many other roads.

In December, 1882, a controlling interest was acquired in the stock of the Chicago St. Paul Minneapolis & Omaha Co., which see.

In July, 1884, the capital stocks (except a few shares) of the Fremont Elkhorn & Mo. Valley and the Sioux City & Pacific were acquired on the terms stated in the Supplement of June, 1885, and prior issues. Their securities, except those held by Chic. & N. W., are in table above.

In December, 1891, the Milwaukee Lake Shore & Western RR. was bought by an exchange of stock. See V. 57, p. 375; V, 56, p. 792.

In Feb., 1900, the lines of the Dakota Central RR. in North and South Dakota were merged in the Winona & St. Peter RR.

Capital Stock.—Of the common stock $2,333,688, and *preferred* $3,795 remained in the co's treasury in July, 1899. Pref. stock has a prior right to 7 p. c.; then common 7 p. c.; then preferred 3 per cent; then common 3 per cent; then both classes share.

The bonds may be issued bearing such rate of interest as shall be deemed advisable. See V. 65, p. 1070. The first issue of $20,000,000, bears 3½ per cent (reg. interest Q.—F., coupon M. & N.). V. 65, p. 69, 111, 571. Up to April, 1900, $9,347,000 had been listed. V. 67, p. 125.

The *sinking fund bonds* of 1879 are secured by deposit in trust of $15,000,000 of 1st mortgage bonds at $15,000 per mile on subsidiary lines, the most important being described in Supplement of May, 1894. Of the sinking fund bonds of 1879 $6,069,000 are 6s; the sinking fund is at least 1 per cent of outstanding bonds, which are subject to call at 105; and through its operation the amount outstanding has been reduced from $15,000,000 to the present figure.

The *sinking fund debentures* of 1933 have a sinking fund of $200,000 per year, if they can be redeemed at 105. These, as also the *debentures* of 1884 and 1891, will be secured by any future mortgage excepting any mortgage "for the enlargement, improvement or extension of the company's property." See description of all the debentures on page 2, Supplement of April, 1895. The 25-year debenture mortgage of 1884 was for $6,000,000, but reduced by sink. fund purchases.

The *extension bonds of* 1886 are secured by deposit in trust of first mortgage bonds at a rate not exceeding $20,000 per mile. Included in the collateral June 1, 1896, were $10,675,000 Fremont Elk Horn & Mo. Valley 1sts and $2,560,000 Wyoming Central 1sts [the Wy. Cent. having been consolidated with F. E. & M. V.], etc. To Jan., 1900, Extension 4s for $18,632,000 had been listed on N. Y. Stock Exchange, of which, July 1, 1899, $1,143,000 were held alive in sinking funds. See F. E. & M. V. bonds below. Union Trust Co. of N. Y., trustee.

The *Fremont Elkhorn & Missouri Valley* consols have a first lien on 1,170 miles (Fremont, Neb., to Deadwood, D. T., 557 miles, and branches to Hastings, Albion, &c., 613 miles), but besides the amount of issue given as outstanding in the table $10,675,000 are held as part collateral for Chicago & Northwestern extension bonds of 1886. The Northwestern assumed $3,600,000 of the Fremont Elkhorn & Missouri Valley bonds and guarantees the rest. See guaranty V. 56, p. 650.

The *Milwaukee Lake Shore & Western* debentures of 1887 were by their terms convertible into M. L. S. & W. stock, but North Western officials state that the bonds are not convertible into North West stock.

Land Grant.—Lands and lot sales in 1898-99 $199,192; net cash receipts $602,103; due on contracts of sale, $724,657; lands unsold and uncontracted for May 31, 1899, 647,975 acres.

General Finances.—The first issue of ($20,000,000) refunding bonds at 3½ per cent interest was sold to provide for $18,015,500 old bonds maturing up to Dec. 1, 1902. If the entire issue of $20,000,000 is required to refund these old bonds the saving in interest charges will be about $530,000 per annum—see "bonds" above and V. 65, p. 69, 111. Maple River first 7s for $402,500 fell due July 1, 1897.

In 1898-99 the average freight train load was 208 tons, against 194 tons in 1897-8; rate per ton mile, 0·87 of a cent. In calendar year 1899 of 20,621,358 tons of freight carried, mineral products furnished 39 p. c., agricultural products 18 p. c., forest products 9 p. c. and manufactures 12 p. c.

Earnings.—Jan. 1 to Feb. 28, 1900 (2 months), gross, $6,095,826, against $5,521,020 in 1899. For calendar year, V. 70, p. 202.
